

**REPORT OF
THE ADJUTANT GENERAL
OF THE
STATE OF FLORIDA**

FOR THE YEAR 1922

T. J. APPLEYARD, PRINTER, TALLAHASSEE, FLORIDA

REPORT OF THE ADJUTANT GENERAL

MILITARY DEPARTMENT, STATE OF FLORIDA,
OFFICE OF THE ADJUTANT GENERAL

St. Augustine, Fla.

From: *The Adjutant General,*

To: *The Honorable Cary A. Hardee, Governor, Tallahassee, Florida.*

Subject: *Annual Report of the Military Department of the State of Florida.*

The following report of the Military Department of the State of Florida, for the year 1922, is herewith submitted:

UNORGANIZED MILITIA

The estimated strength of the Reserve Militia of the State of Florida is 210,000.

THE NATIONAL GUARD

On December 31, 1922, the National Guard of Florida was as follows:

Staff Corps and Departments.....	9
Line Officers	85
Enlisted Men	1,550

Total	1,644

This shows an increase during the year 1922 of thirteen officers and eighty-one men.

While these figures do not show a maximum strength for the number of organizations now within the State, it is to be remembered that within the year 1922 the Florida National Guard companies in many instances have completed their first three years of service. This means that an unusual number of discharges from service have been made and that it will take these organizations a little time to regain this loss.

The maximum strength which may be obtained by the Florida National Guard (with present organizations) is approximately 2,200 commissioned and enlisted personnel.

NATIONAL GUARD RESERVE

Commissioned Officers	9
Total	9

On December 31, 1922, the Florida National Guard consisted of the prescribed Staff Corps and Department; one complete Regiment of Infantry with sixteen units; one Motor Transport Company; one Motoreycle Company and one complete battalion of Field Artillery: making a total of twenty-three organizations.

The year 1922 has, considering all phases of training and other conditions, been a most successful one for the Florida National Guard. During the year but few changes were found necessary in the status of organizations. Those made were:

Disbanding of Co. "L" 154th Inf., Wauchula, Fla., and transfer of company to St. Petersburg.

Headquarters Company of St. Petersburg being transferred to form Company "L."

A new headquarters Company was then organized and mustered at Jacksonville.

The station of the 154th Infantry band was transferred from St. Petersburg to Sanford.

Medical Detachment 154th Inf., station transferred from Jacksonville to Sanford.

NEW ORGANIZATIONS IN 1922

Headquarters Company, Jacksonville.

First Battalion Hdqrs. 116th F. A., Tampa.

Hdq. Det. & Combat Train, 116th F. A., Tampa.

Other new organizations of the Florida National Guard organized and mustered during 1922, but not federally recognized, are:

Engineer Company, Panama City.

Engineer Company, Century.

These organizations comprise seventeen officers and two hundred and sixty enlisted strength.

NAVAL MILITIA

None organized in the State at the present time.

EFFICIENCY

At the present time, the Florida National Guard is a very efficient organization. The majority of the Officers and Non-commissioned Officers are men who have seen much service, not only in the last war, but in previous activities, consequently the companies are better trained than ever before. All of the companies are thoroughly equipped and are ready for active duty at any time.

INSPECTIONS

Federal Armory Inspection of the various organizations

in the Florida National Guard was made in January, 1922, by Colonel Earl C. Carnahan, the Regular Army Senior Instructor for the State of Florida. The Companies were found to be in very good condition and both officers and men were highly commended by the Instructor.

ANNUAL ENCAMPMENTS

Three Camps of Instruction were held in connection with the Florida National Guard in the year 1922. The Infantry, Motor Transport and Motorcycle Companies were concentrated at Camp Johnston (Black Point) for a fifteen day period, the Artillery Battalion from Tampa attended an artillery camp held at Camp Bragg, N. C., while the Coast Artillery Company was sent to Fortress Monroe, Va., for its annual instruction period.

INFANTRY CAMP

The Annual Camp of Instruction at Camp Johnston (Black Point) was held August 4th to 18th, inclusive, 1922. This camp was attended by the State Staff, Corps and Department, entire 154th Infantry, the 220th Motor Transport Company and 114th Motorcycle Company. The School of Instruction which was to have been held for four days prior to the Camp was cancelled on account of a lack of Federal funds.

The schedule for the Camp prepared by Colonel Earl C. Carnahan, Senior Instructor, and approved by the Commanding General 4th Corps Area, was carried out in a most satisfactory manner. Bad weather interfered to some extent and caused a delay in the completion of range work and thereby cut short the field maneuvers planned for the Camp.

The attendance at this camp was particularly good and a splendid spirit prevailed. Strict discipline was enforced, but the conduct of the men was so good that little or no effort was necessary to be exercised in this direction.

The report of the Senior Instructor, published as a General Order, and made a part of this report, shows that remarkable progress was made by the troops while in attendance at this camp.

ARTILLERY CAMP

The 1st Battalion, 116th Field Artillery regiment, went into camp at Camp Bragg, N. C., with the regular army from July 24th to August 7th, inclusive. This battalion made a remarkable showing, having carried 90 per cent of its personnel into camp with it.

The report of the Commanding Officer, Camp Bragg, published in General Orders, and made a part of this report, shows that the battalion was found very efficient and made splendid progress in its work while in the field.

COAST ARTILLERY INSTRUCTION

The 437th Company, C. A. C., went into camp at Fortress Monroe, Va., July 8th to 22d, 1922, inclusive. This Company carried practically its entire strength to Fortress Monroe and, according to reports from the regular instructors, did unusually fine work. This is the only company of Coast Artillery in the State, and the remarkable spirit shown by the personnel is always favorably commented on.

AID TO CIVIL AUTHORITIES

Twice during the year the National Guard was called upon to assist the civil authorities in maintaining the peace. One of these calls was made at Jacksonville, Duval County; the other being in Tampa, Hillsborough County.

The reports of these occasions as rendered by the Commanding Officers of the Posts from which troops were employed are shown in Appendix G of this report.

NATIONAL MATCHES

During the year 1922 the State furnished one National Guard Team to compete in the National Rifle Matches that were held at Camp Perry, O., Sept. 2d to 28th, inclusive. The attendance of the Civilian Rifle Team was cancelled on account of lack of Federal funds. Major Chester H. Wilson was detailed as Captain of the Team; Captain George M. Coslick was detailed as Team Coach. Our National Guard team did good work improving on their previous records.

The report of Major Wilson covering the work of the team is shown elsewhere in this report. The entire team is to be commended on the showing made, and it is confidently expected that next year our team will go into a still higher class.

STATE CAMP GROUNDS AND RIFLE RANGES

The State Camp Grounds and Rifle Ranges, which were used by the Federal Government during the World War and turned back to the State in June, 1921, together with a number of buildings erected by the Federal Government on the land, were still further improved during the early part of 1922. The Federal Government allowed us about \$3,800 to spend on putting the range in first-class condition, and it was in much better shape for use than the previous year. Also the buildings were all given a coat of creosote and roofs repaired. Generally speaking, the Camp is in splendid condition at this time, but there is considerable more work required to restore the parade and drill grounds and also some additional work on the target range. The State now has a splendidly equipped Camp with ample buildings to take care of 5,000 men, a good fire department and a rifle range which probably has no superior in the United States. Altogether the National Guard of the State and the citizens of Florida have every reason to be proud of the splendid camp ground and target range.

which the State has acquired at very little cost. This Camp and rifle range is splendidly located and well adapted for the purpose. The grounds are a natural park and are open to the people of the State at all times and are utilized by quite a large number of people every week. It is probable that this property will reach a value of more than half a million dollars.

STATE ARSENAL

The Legislature of 1921 appropriated \$40,000 for the repairing of St. Francis Barracks Building injured by fire in 1915. The Legislature also requested our Senators and Congressmen to secure the transfer of the property by the War Department to the State of Florida. Senator Trammell introduced a bill for this purpose and all of our representatives worked very hard to secure the passage of the bill. Same was passed and approved March 1, 1922, and reads as follows:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Government building and the land connected therewith, known as Saint Francis barracks, at St. Augustine, Florida, be, and the same is hereby donated to the State of Florida, to be held by said State and used for military purposes, subject to the following express conditions, that upon notice in writing by the President of the United States to the Governor of the State of Florida, that the United States has need for said property, this grant shall cease and determine and title to said lands and all improvements thereon shall immediately revert to the United States. Approved March 1, 1922."

It was not thought best to expend the appropriation of \$40,000 until after the property was turned over to the State, which caused some delay in the repair of the property. However, in September, 1922, bids were advertised for, and on October 2 the State Arsenal Committee awarded the contract for the repair of the building to the

Southern Construction Company of Pensacola, Fla. It was found that the appropriation was not sufficient to do the entire work, so that the heating plant was eliminated temporarily and the contract was let to the Southern Construction Company for \$37,500.00 to complete the building, less the heating plant. The Construction Company immediately went to work and it is expected that the building will be finished in February or March, 1923. A large part of the building will be used for an Armory and thereby save the State some rental which it is now paying, and the offices of the Military Department will be moved into one wing.

The entire property turned over to the State has been very much improved, but several of the buildings require painting and new roofs. It is thought that the State is very fortunate in acquiring this splendid property without cost, and thereby saving the building or rental of large store rooms for the safe keeping of the National Guard property. When it is stated that the Federal Government has turned over to this State approximately fourteen hundred thousand dollars worth of property, a portion of which has to be stored at the State Arsenal, it can be understood what large store rooms are necessary.

GROUNDNS

The grounds surrounding the buildings are in excellent condition.

RECORDS OF EX-SERVICE MEN

I again desire to renew my recommendation that the Service records of all men from Florida who served in the World War should be published as soon as practicable. Up to this date the War Department has not furnished all of the records, but it is thought that same will come in during the next six months. When these records are published they should show the town and county from which each

men enlisted, as well as other information. The War Department does not furnish the county from which these men enlisted, and it will require a considerable amount of close and careful work to locate definitely a large number of the addresses given on the record. This failure to have the records by the counties has caused this office quite some embarrassment on account of being unable to furnish lists as requested by the various counties throughout the State. The records furnished by the War Department to date show approximately the following number of men who served in the World War from Florida:

ARMY

Drafted (white)	12,012
Drafted (colored)	12,904
Volunteers	10,951
Total	35,867

NAVY

Enlisted (males)	5,301
Enlisted (females)	33
Total	5,334

MARINES

Enlisted	242
----------------	-----

KILLED AND DIED IN SERVICE

Soldiers	976
Sailors	79
Marines	
Total.....	1,055

STATE APPROPRIATIONS

Expenses of the Florida National Guard: Allowances; Armory Rent; Salaries; General Operating Expenses:

January 1, 1921, by Appropriations, \$56,050.00

December 31, 1922, expenditures for the year, for armory rent, allowances paid to organizations, salaries and the miscellaneous expenses of the Military Department, see list of Comptroller's warrants shown in Appendix.

Fund to co-operate with the War Department to re-establish ex-service men:

By appropriation for year 1922 \$1,800.00

Expenditures by Ex-service Men's Bureau, see list of Comptroller's warrants shown in Appendix.

Appropriation for preserving the peace; last six months, 1922 \$10,000.00

Expenditures preserving the peace, see list of Comptroller's warrants shown in Appendix.

Appropriation for repairing of State Arsenal. \$40,000.00

Expenditures repairing of State Arsenal, see list Comptroller's Warrants listed in Appendix.

PROPERTY AND FUNDS FURNISHED BY THE FEDERAL GOVERNMENT

Equipment (value) \$1,230,870.00

Annual Expenditures:

Eneanipments	69,720.40
Armory drills	65,057.26
Caretakers, upkeep and ranges.....	14,411.01
Total	\$1,380,058.67

GUARD MAGAZINE ESTABLISHED

On December 1, 1922, publication of a National Guard Magazine was started under the caption, "Sound Off," with Lt. Chas. E. Harris, 154th Inf. N. G. F., as its editor. The purpose of the magazine was that of a "house organ" of the Florida Guard, and its future will be devoted toward the upbuilding and broadening of the State's military establishment.

CHARLES P. LOVELL.
The Adjutant General.

APPENDIX A

REPORT OF EX-SERVICE MEN'S BUREAU, STATE OF FLORIDA

February 26, 1923.

From: *W. S. Criswell, Chairman, Ex-Service Men's Bureau.*To: *The Adjutant General.*Subject: *Annual Report.*

1. Attached hereto is a statistical statement rendered by the Ex-Service Men's Bureau during 1922.

2. In addition to this service the Bureau served as a center of Ex-Service Men's activities generally, promoting good feeling and mutual understanding among Ex-Service Organizations generally.

3. Another outstanding service rendered by the Bureau was the co-operation with the City of Jacksonville in handling the unemployment problem. Two thousand dollars at the request and on the recommendation of the Bureau was devoted to furnishing employment to the unemployed, the city giving preference to ex-service men and never failing to put them to work on application, the Bureau did the investigation in these cases and its recommendation was uniformly followed.

W. S. CRISWELL, Chairman,
Ex-Service Men's Bureau.

FLORIDA EX-SERVICE MEN'S BUREAU
Jacksonville, Florida

The following is a summary of the work done by the Florida Ex-Service Men's Bureau from January 1, 1922, to December 31, 1922:

Information and Advice:

Three hundred fifty-eight cases were handled under this heading. In most instances the service was rendered by mail.

Transportation:

Twenty-two men were assisted in securing money from friends or relatives in order that they might return home.

Employment:

Two hundred fifty-one men were given employment through the efforts of this Bureau.

References:

Seventy-three applicants were set straight and referred to the U. S. Veterans' Bureau for vocational training and compensation claims.

Lost Discharges:

One hundred and two men were assisted in securing copies of their lost discharges.

Notary Service:

Fifty-three men were given free notary service.

Victory Medals:

Sixteen men were assisted in securing Victory Medals.

Victory Buttons:

Seven men were assisted in securing Victory Buttons.

Medical Attention:

Twenty-two men were given free medical attention through the efforts of this Bureau.

Meals, Lodgings, Clothing:

Fifty-nine men were given meals, lodging or clothing through the efforts of this Bureau.

The Florida Ex-Service Men's Bureau during the year of 1922 handled 682 new applications and 377 repeaters, making a total of 1,059 applications.

APPENDIX C

Jacksonville, Florida.
September 30, 1922.

HEADQUARTERS 154TH INFANTRY, FLORIDA NATIONAL GUARD

To: *The Adjutant General, State Arsenal, St. Augustine.*
Subject: *Report on August Encampment.*

1. AUTHORITY. In compliance with General Orders No. 7, A. G. O., Florida, July 18, 1922, the following report of the fifteen day Field Training Camp of the 154th Infantry, Florida National Guard, and attached Units, during the period August 4 to August 18, 1922, is submitted.

2. OFFICERS AND ORGANIZATION. The following Units of the 154th Infantry were present:

REGIMENTAL HEADQUARTERS, 154TH INFANTRY, F. N. G.

Col. Raymond C. Turek.....	Infantry.....	Commanding
Lt. Col. Vivian B. Collins.....	Infantry.....	Executive Officer
Major Chester H. Wilson.....	Infantry.....	Regimental Machine Gun Officer
Major Ralph E. Stevens.....	Medical Corps.....	Regimental Surgeon
Capt. Chas. H. Andress.....	Infantry.....	Regimental Adjntant
Capt. Alvin Register.....	Infantry.....	Regimental Plans and Training Officer
Capt. John R. Ingram.....	Infantey.....	Regimental Supply Officer
Capt. Theodore A. Blinn.....	Medical Corps.....	Medical Officer
Capt. Carroll H. Frink.....	Dental Corps.....	Dental Officer
Capt. Frank E. Boardman.....	Dental Corps.....	Dental Officer
1st Lt. E. A. Albritton.....		Regimental Chaplain

Unit.	Station.	Commanding Officer.	Officers.	Men.
1st Battalion.....	West Palm Beach.....	Major David F. Dunkle.....	2	0
2d Battalion.....	Live Oak	Major Yandell O. Brown.....	2	0
3d Battalion.....	Tarpon Springs.....	Major Jay H. Henning.....	2	0
Company A.....	Daytona	Capt. H. C. F. Dolan.....	3	65
Company B.....	Miami	Capt. Robert N. Ward.....	3	70
Company C.....	West Palm Beach.....	Capt. Chas. M. Holtzman.....	3	64
Company D.....	Sanford	Capt. Geo. A. DeCottes.....	3	41
Company E.....	Live Oak	Capt. Bernard L. Rhodes.....	3	67

Band Section.....	Sanford	Major Ralph Stevens.....	0	33
Medical Detch.....	Sanford	Major Ralph Stevens.....	0	31

The following officers of the State Staff Corps reported for duty and were assigned as follows:

Major Jacob H. Spengler.....	Q. M. C.....	Camp Quartermaster.
Capt. Geo. G. Garcia.....	I. G. D.....	Camp Instructor.
Capt. Gen. M. Coslick.....	O. D.....	Camp Ordnance and Range Officer.
Capt. Geo. W. Bussett, Jr.....	J. A. D.....	Camp Judge Advocate.
Capt. C. Seton Fleming.....	A. G. D.....	Camp Sanitary Officer.
Capt. Alpha O. Storer.....	G. M. C.....	Assistant to Quartermaster.
2d Lieut. Chas. P. Lovell, Jr.....	Q. M. C.....	Assistant to Quartermaster.

The following organizations of the Florida National Guard reported for duty as attached units:

Organization.	Station.	Commanding Officer.	Officers.	Men.
220th Motor Transport Co.,	Jacksonville,.....	1st Lt. J. H. Fanette,.....	2	38
114th Motorcycle Co.,	Jacksonville,.....	1st Lt. E. V. Garcia.....	2	37

The total average present in Camp was seventy-six (76) officers and ten hundred and ninety (1,090) men. It is a notable fact that a total of seventy-seven (77) officers in the State ordered to this Camp, seventy-six (76) were present for duty.

3. DRILL AND INSTRUCTION. On account of the intensive firing program in an attempt to fire Course "A" as well as the preliminary and instruction courses during the fifteen day training period, instruction in drill and field work was necessarily limited. This is regrettable and is not believed to be for the best interests of the Guard. While the advantages of and the necessity for a reasonable amount of training in rifle fire during the short camp period is acknowledged, yet the opportunity to build Battalion and Regimental spirit through competitive drills and field maneuvers should not be neglected. Fifteen days is all too short a time for the once a year training of troops in field work and the training of Company, Battalion and Regimental Commanders in the handling of their commands in simulated battle problems. The training schedules prepared by the Senior Instructor in compliance with instruction from higher authority provided for four days of training and eight days of rifle practice, and were carried out. Inasmuch as the afternoons of each battalion's training days were devoted to athletics, there were really but four half-days of training for the rifle companies during the Camp.

The schedules for Machine Gun Companies, special and attached Units and Medical Detachment were followed as closely as the firing program, abundant rain and sickness permitted.

On the whole, aside from the training in ceremonial work (parades, reviews and guard mount), the instruction in drill and field work is considered to have been highly unsatisfactory.

The cup in competitive close order drill was won by Company "A" of Daytona.

4. INSTRUCTORS. The Camp was fortunate in having

assigned to it as Instructors, four Army officers who were not only efficient as Instructors, but who possessed qualities of spirit and disposition necessary to attain the best results in National Guard work.

Col. Earl C. Carnahan, Inf. U. S. A., Senior Instructor.

Major Walter Pridgeon, Inf. U. S. A.

Major Cleveland Garrison, Inf. U. S. A.

Capt. J. L. Ballard, Inf. U. S. A.

In addition, Captain E. H. Freeland, Coast Artillery, U. S. A., on duty at Jacksonville, volunteered his services and gave notable assistance. The five United States Army Sergeant-Instructors, on duty, rendered valuable service. The work of Sergeant E. E. Adams, U. S. A., as Instructor in pistol firing, is especially to be commended. Instruction in machine gun training and fire was in charge of Major Chester H. Wilson, Infantry, Florida National Guard, Regimental Machine Gun Officer. The splendid results obtained by the Machine Gun Companies speak for themselves.

A talk by Colonel Earl C. Carnahan, at the opening of the Camp, contained so much of value to the troops that it was published as a Camp Bulletin in and is attached hereto as "Appendix A."

Instruction in thirty-seven mm. guns and Stokes mortars was given by Captain Alvin Register, Regimental Plans and Training Officer, 154th Infantry.

5. FIELD PROBLEMS. One Battalion and one Regimental field problem were held during the Camp. It is to be regretted that the other two battalions were prevented from holding battalion field exercises and that the terrain exercises, as outlined by Major Pridgeon, could not be given because of lack of time on account of the extensive firing program and rain. Previous to the Camp, detailed maps of the terrain adjoining the Camp on the west were prepared and sufficient number of blueprints were made for distribution down to platoon commanders.

The work of Mr. George W. Simons, Jr., Chief Sanitary Engineer of the State Board of Health; Mr. Alfred Nen-

man, Assistant Sanitary Engineer, and Sergeant Frank Whiddon, of Headquarters Company, 154th Infantry, on these maps, prior to Camp, is highly appreciated.

The regimental field problem, with the regiment as advanced guard of a division, was a decided success. The value of a close liaison was stressed as was instruction in the utilization of cover and the employment of auxiliary arms in support of Infantry. It is to be hoped that during the next training period more time can be given to this valuable part of troop training.

6. RIFLE FIRING. In the record course, there were qualified thirty-five (35) expert riflemen, thirty-three (33) sharpshooters and eighty-eight (88) marksmen. The individual high score in both slow and rapid fire was won by Captain Preston Ayres of Company "K."

Company high score was made by Company "F," 154th Infantry. This Company qualified ninety-one per cent of the men firing. This record is believed to be due to the preliminary training which was given the Company for several months preceding the Camp at the Armory and practically every Sunday morning, during this period, on the Rifle Range.

The first three days in Camp were devoted to preliminary training under the direction of the company officers and instructors. Following the preliminary training, the entire course was fired in six days, this for the reason that the Camp Program allowed only two Battalions on the Range each day with pit details furnished from such Battalions. The record course was hurried through in two days. An average of ten hours a day was required to complete the program, and with the pit work requiring eleven hours a day, the interest of the riflemen was lessened and was evidenced in the final results. That no more men completed the preliminary instruction was due to the fact that on account of a great deal of sickness in the command, a large number of rainy days and other lack of time, there were but seven full shooting days. Taking into consideration the very adverse conditions of sickness, rainy weather

and lack of time, it is believed that the record made by the Regiment is creditable.

All firing was placed in charge of Lieutenant Colonel Vivian B. Collins, with Captain George Coslick as Range Officer and Captain J. L. Ballard as Instructor. The Regimental Commander desires to commend most highly the efficient and untiring work of these officers and also the cordial co-operation of the Battalion Adjutants of the pit details.

The Rifle Range was in splendid condition. Too much credit can not be given to Major Jacob Spengler, Camp Quartermaster, for his excellent and most efficient work in the preliminary preparation of the Range.

As the result of this firing program, it is believed to be highly advisable to attempt to fire Course "A" and all the preliminary practice during the period of a fifteen day Camp. It is practically impossible to adequately give preliminary training, practice fire and record fire, in the limited time prescribed. Further, it is believed to be essential that each company train good coaches, that all preliminary instruction be given and that all instruction courses be fired by troops before coming to Camp. It is also believed to be desirable for the best interests of the troops that work on the Rifle Range and in the pits be limited to a maximum of eight hours per day.

7. MACHINE GUN TRAINING. The work of all machine gun companies in their training and drill as well as in their firing is most highly commended. The record of qualification of fifty-one per cent of all the companies is considered excellent. The Camp Commander is especially proud of the fact that twelve officers and men qualified as expert machine gunners. The night firing problem was highly spectacular and was given as a demonstration for the Governor of Florida and the visiting Rotarians. It was carried out with four Browning machine guns, firing live and tracer ammunition. During the course of the preliminary training and record fire, a total of 181,500 rounds of ammunition was expended. The report of the Regimental

Machine Gun Officer, Major Chester H. Wilson, is appended hereto as "Appendix B." The recommendations embodied therein are approved.

8. QUARTERMASTER DEPARTMENT. The work of the Quartermaster Division, not only in the preliminary preparation, but in the general handling of the Camp itself, can not be too highly commended. I have never seen a Quartermaster Department run more smoothly in any Camp. Great credit should be given to Major Jacob Spengler for his excellent handling of this department.

All transportation was pooled under the direction of the Camp Quartermaster. This arrangement worked out very satisfactorily. The motor transportation was at all times in good condition and available for use.

While it is presumed that all companies and all individuals will be completely equipped before coming to Camp, there are always a number of recruits who have been enlisted in the last few days or perhaps the day before entraining who have not the full equipment and who cannot be equipped from stock in the Company storeroom. Again there is always a possibility of destruction of uniform by accident or hard usage during the period of the Camp itself, so there always will be some necessary replacement. It is suggested that in the future, the Camp quartermaster carry to Camp a small stock of various sizes of uniforms and shoes.

9. MESSING AND QUARTERS. The men at all times were well satisfied with their mess. The messes were excellent on the allowance of fifty cents per day per man. Attention was given to instruction of mess sergeants and company commanders in proper ordering and planning for their messes on a monetary basis. In addition, Camp schools for cooks were established and instruction given therein. In accordance with General Order No. 1, Field Training Camp, two or more units were permitted to mess together and form single messes. Such units for this purpose were quartered next to each other so far as possible. Such combined messes, except in the case of the Medical

Detachment and Band Section, were in charge of the senior organization commander and the senior mess sergeant and senior cook were designated each to head his own department during the entire camp period unless removed for cause. This arrangement worked out very satisfactorily.

Quarters were in excellent condition. Again credit is due to the Camp Quartermaster for his preliminary work in placing the barracks, latrines, mess halls, and kitchens in splendid shape. The officers' messes were unsatisfactory under the charge of a civilian steward, so much so that it was necessary to take over these messes and place them in charge of commissioned officers. Under Captains Register, Dolm and Bassett, the financial difficulties of the messes were straightened out and the arrangement was very satisfactory after that time.

10. HEALTH AND SANITATION. On account of the prevalence of dengue fever, and grippe or influenza throughout the State, several companies came into Camp bringing these diseases with them. There was as a result a great deal of sickness during the Camp, necessitating the hospitalization of seventy-two (72) patients in the Camp Infirmary with an average number of men at sick call each morning of one hundred and twenty-five (125). At no time, however, was more than fifteen per cent of the command disabled on account of sickness. This is considered to be very good in view of the current epidemic and the continued bad rainy weather. But one case of pneumonia developed and was sent to St. Luke's Hospital in Jacksonville. The Regiment was short one medical officer and the State Surgeon was not present, therefore, but two medical officers were available to handle the entire Camp. The work of these officers, Major Ralph E. Stevens and Captain Theodore A. Blinn, was most highly commendable. The dentists, attached to the Regiment, Captain Carroll Frink and Captain Frank Boardman, were utilized as assistants to the medical officers in hospital and sick call work and, in addition to that, they were assigned to duty as medical

officers on the rifle range during the firing. Including the typhoid and smallpox vaccinations, the medical division handled a total of 2,318 cases during the fifteen day period. The report of Captain Theodore A. Blinn, commanding officer of the Camp Infirmary, is attached hereto as "Appendix C." Sanitary orders were issued as Camp General Order No. 3, and special attention was paid to the management and prevention of communicable disease on account of the current epidemic. Sanitation and police of the Camp were at all times satisfactory.

11. DETRAINING AND ENTRAINING. All companies detrained and went to their quarters with machine like precision. There was a notable absence of noise and confusion. All companies left Camp in the same quiet, expeditions manner. Camp General Order No. 4 covered the entraining and departure of the troops. All companies were held until report was received from the Camp Police Officer and Camp Inspector that quarters, barracks and kitchens were clean, and that all bills had been paid.

12. MILITARY COURTESY AND DISCIPLINE. The Camp was at all times under strict discipline. There were but few disciplinary measures necessary and but few summary courts. At all times, the Camp was under excellent control. Military courtesy was stressed from the beginning. Effort was made at all times to teach the men to look like smart, snappy, well dressed soldiers. The saluting of this regiment is believed to be exceptionally good.

Credit is due to the intelligence section of the Headquarters Company for their work in locating vendors of moonshine and other liquor in the barber shop and in causing the arrest of these men and turning them over to the civil authorities in Jacksonville.

13. MORALE AND ESPRIT. The growth in spirit of all units down to platoons was noticeable. This was fostered by abundant competition in rifle firing, drills and athletics, and there was evidence among the officers and men of an increasing interest and pride in the Regiment itself. In spite of the hard work brought about by the con-

tinued rain and much sickness in Camp, morale was high. It was evident, at all times, that there was a willingness to work and learn. But little complaint was made of the hard, arduous hours on the rifle range in the rain and of the hard work in the pits. On account of the hard training during the week but one formal Sunday inspection was held. Abundant passes were given, in fact effort was made to get the men out of the Camp each night and during the holidays. A truck train was sent to the city every night to return before taps for the benefit of the men. All men, before going to the city, were inspected by their Company Commander as to the cleanliness of uniform and also proper saluting and soldierly bearing.

14. ATHLETICS. Each battalion on its days off the range devoted the afternoons to athletics. In addition, there was a field day for athletic competition in which cups were given. Athletic competitions are believed to be strong factors in the formation of unit spirit. The battalion spirit was especially noticeable in the battalion baseball games.

Organization.	Station.	Event.	Donor.

Company F.....	Jacksonville.....	Remington trophy.....	Remington Co.
2d Battalion	Live Oak.....	Battalion baseball.....	Bertha Bouton Trunk.
Pvt. Jerry Dulmage....	Jacksonville.....	Individual athletic event..	V. E. Jacobs Jewelry Co.

15. CEREMONIES. Battalion parades were held each afternoon except Sunday. Two Regimental parades were held on the Rifle Range in the mud and the review for the Governor was staged on the river bank beyond the original parade grounds. In spite of lack of space, the Regiment formed, wen through its parade and snapped past the reviewing stand without a hitch and with machine-like precision. It was a very creditable performance. Many officers of the National Guard as well as those of the Regular Army and World War who witnessed the guard mount put on by Company "A" immediately following the Governor's review stated that they had never seen one better. The synchronized inspection of rifles by the two platoon lieutenants in time to the waltz music of the band was a spectacular innovation. The Rotary Club of Jacksonville dined at the Battalion Officers' mess on the evening of the Governor's review. This was a most enjoyable occasion.

16. VACCINATION AND INOCULATION. On August 14th the Regiment was one hundred per cent vaccinated and on Augnst 17th was one hundred per cent inoculated against typhoid. It will be noted that the Regiminent came into Camp ninety per cent vaceinated and eighty-six per cent inoculated. Of the fourteen per cent uninoculated, it must be stated that at least one-half of these had had one or two shots of the typhoid.

That the result was obtained is believed to be due to the determination on the part of the Adjutant General's Office and Regimental Headquarters that the command would be completely vaccinated and inocnlated and that suffieient orders and instructions were issued early in the spring and steps were taken to see that they were carried out.

With the Units scattered as they are about the State, it was very difficult to obtain the services of Medical Officers of the Guard or Reserve Officers, and I regret to say that local physicians were loath to volunteer their services. This difficulty was overcome by appeal to the State Board of Health inasmuch as the prevention of smallpox and typhoid is distinctly a State Board of Health function,

and they gladly sent out a District Health Officer to inoculate and vaccinate men in various Units about the State. I believe this can be done by every State in the Union, and I feel sure that every State Health Officer would be willing to co-operate in the immunization of troops.

That the troops came into Camp not completely vaccinated and inoculated may be explained by the fact that many new recruits were taken into the Regiment the last week and even in the last few days. As each Company came into Camp a report was made by each Company Commander showing the number of men completely vaccinated and inoculated and giving the names of the uncompleted cases. These lists were turned over to the Regimental Surgeon and the inoculations and vaccinations completed. In only one instance was it necessary to confine a Company Commander to Camp for a short period until he had all his derelicts rounded up and sent to the Regimental Surgeon for treatment.

17. AMUSEMENT—LECTURE. Thanks are due the Y. M. C. A. for the establishment of an excellent "Y" at Camp. A moving picture machine was provided and films were given. Space was provided for writing together with a plentiful supply of writing material. It is recommended that before the next Camp a suitable building be provided so that the Y. M. C. A. may be made a permanent feature of the field training period. A lecture on venereal disease prevention with a moving picture film and a large exhibit was given by Captain W. H. Gillette of the offices of the State Board of Health and United States Public Health Service.

18. SUMMARY. The Camp is considered to have been a decided success in spite of bad weather and much sickness.

While the absolute necessity and the value of thorough training in rifle, machine gun, pistol and other fire is understood and acknowledged, still it is believed that "Course A" can not be fired, with the preliminary training and practice fire, with any degree of success during

the period of a fifteen day camp, and furthermore, that at least one-half of the time in Camp should be devoted to platoon, company, battalion and regimental training, especially in field exercises.

It is believed that the hours of work for National Guardsmen in the fifteen day Camp should be limited to eight hours per day.

It is recommended that before next Camp, the old original parade grounds, between the present military service club and the barracks, be leveled so that it may serve as a dry parade ground for the troops.

This report would be incomplete without mentioning the splendid work of the Howitzer Company of the 154th Infantry. In firing thirty-seven mm. guns, this organization had difficulty in keeping up its targets, tearing them up as fast as they were erected. The Stokes mortar section fired with amazing accuracy up to six hundred yards. This Company may well be considered, as it has been called, a "deadly outfit."

R. C. TURCK,
Col. 154th Inf.,
Comdg.

EXHIBIT A

**HEADQUARTERS
ONE HUNDRED FIFTY-FOURTH INFANTRY,
FLORIDA NATIONAL GUARD**

August 14, 1922.

Bulletin No. 1:

The following address by Colonel Earl C. Carnahan, Infantry, D. O. L. U. S. A., Senior Instructor, F. N. G., to Officers of the Annual Field Training Camp, F. N. G., on August 4, 1922, is commended to all Officers and men of the Regiment for careful study and consideration.

The Regimental Commander is confident that the Officers and Non-Commissioned Officers of the Regiment will avail themselves of the many excellent advisory points and will make every effort to correct the faults depicted therein, so that before next Camp, we will have a "well trained, smooth working machine of high morale, ready for the most advanced field training.

By order of Colonel Turek,

C. H. ANDRESS,
Capt. 154th Inf. F. N. G.,
Adjutant.

The Commanding Officer and Gentlemen of the Guard:

You have been assembled at my request for a conference on the Training Programs for this camp and the coming Annual Armory Training period.

My remarks will be largely concerned with explanation of my reasons for the fundamental simplicity of those programs.

In the preparation of these remarks I beg of you to believe

that I have been animated by only the kindest sentiment toward the Guard and sympathetic understanding of many of its problems and difficulties. This statement, I am sure, would be gladly confirmed by those among you with whom I have been most closely associated during my 8 months service with your organization. I have a full appreciation of the fact that you are in the Guard for the love of the service, and, in many cases, at personal sacrifice of time, comfort, and money. I realize that, differently from the Regular, soldering is not your profession and that the time and study devoted to it by you is taken from your normal work and times of recreation. I have known for years that the Guardsman had the same lessons to learn as the Regular but that owing to his different situation he did not have the same time to devote to them nor the same opportunities to learn them in all their minutia and completeness and that, necessarily, his teachers and advisors must recognize these essential differences, both in their attitude as teachers and advisors and also in their capacity as judges of both his merits and his shortcomings. My experience among you has not only confirmed this view but broadened it and led to a deeper sympathy with and understanding of your problems than I had when I came. Along with these things there has also come great admiration of the fine work you are doing and a profound belief that you will continue to progress.

Animated, as I am, by these sentiments and believing in your high sense of duty and willingness to improve your service, I am sure you will not only listen to some criticisms that I deem it my duty to make in the interest of the Guard but also will believe them dictated wholly in kindness, fairness, courtesy, and sympathetic interest. I believe, also, that you will recognize the fact that the remedies suggested were born of the same spirit. I assure you that if my interests were not real it would be much more agreeable to me to take "the easier way" and tell you only the good things that have come under my observation; but you would not be deceived by such action and would only have less respect for me as in the case of any other man who failed in his manifest duty. Therefore, I shall speak of conditions as I have found them.

We are men together, animated by love of a common service. For the sake of that service we can afford to call a spade a spade. We will do it with a smile and in all good nature but will still say spade in the same way and for the same reasons as a set of business men met together to discuss the work of the past year and means and methods for improved results in the coming year.

Simplicity and thoroughness in fundamentals—in the small basics—were my guiding thoughts in the preparation of both papers. Pray do not gain the impression that I thought or think that you are without knowledge, much training (most of you,) a high sense of duty, or proper enthusiasm. Quite the contrary is the case. But I have thought, and still think, that one period of camp training and one armory training in some of the small, basic things of soldering will benefit practically all of you. Craving your kind indulgence, I will try to illustrate. In the first place, it would not flatter you nor would it be fair to you or to my sense of duty if I failed to say that as the

result of my Armory Inspection last January and of much observation along various lines since I cannot escape the conclusion that, with some notable exceptions, the greatest need you have is to become thoroughly grounded in fundamentals—in the basics of soldier work. I have observed much really fine work along certain lines and much enthusiasm and devotion to duty on the part of many, but this does not obviate the fact that there is a crying need for fundamental knowledge in most cases. This need varies, of course, but it is in practically all cases in greater or lesser degree.

The same thing is also true in these "bigg-hrow" days to a greater or lesser extent in the Regular service. In view of this state of affairs, it is truly a matter of both wonder and congratulation that you have done so well with your far more limited opportunities. But, it may be repeated, any progress you may have made under difficult conditions will not excuse failure to examine into accompanying shortcomings nor proper effort to remedy them. This thought applies not only to company officers but also to all others; to each, of course, along the lines of his special functions. For instance, it is not expected that a major shall study the details of the schools of the soldier, squad, etc., in the same way as company officers nor that the colonel and staff of a regiment or officers of the state staff corps and departments shall concern themselves with petty detail that is the function of others. But it is meant to say that each officer of these classes of officers should perfect himself in the fundamentals of his special functions. It is just as important for a lieutenant to know the details of squad drill in all respects and to be able then to impart that knowledge in an instructive way as it is for a colonel to know exactly what he wishes to order, whether or not it is legal, and how to phrase the order, transmit it, and see to its execution. It is far better for a lieutenant, captain, major, or colonel to be a really good lieutenant, captain, major, or colonel than a half-baked, superficially informed officer of the next higher grade to the neglect of the knowledge and duties of his own grade because, forsooth, he is tired of being "held down" or "not given a chance" and deems himself fitted for bigger things. We cannot all be generals any more than all lawyers can be judges or clerks become general managers. If each man thoroughly qualifies himself for the duties of his grade and—of FAR more importance—actually performs them in a thorough manner he will not only thus qualify himself for those higher grades but will surely receive promotion in due time.

Before discussing the details of the two Training Programs which were designed both for general training and the correction of some of the fundamental faults in the present training of the Guard it will be well to point out some of those faults as I have seen them. To generalize, it may be said that they are primarily due to lack of THOROUGHNESS.

It is not proposed to bring a long bill of particulars; the naming of some few specific items and the suggestion of remedies being deemed sufficient to illustrate the situation and point the way to your own observation and determination along similar lines:

(a) Schools not held for officers and N. C. O's. or, if occasionally held, not properly conducted, they being little more than the reading of a few paragraphs aloud by some person to the others followed by a more or less perfunctory discussion. Drill Regulations, for instance, is a peculiarly difficult study, simple as it may seem to the ordinary man. Students must actually learn the subject so thoroughly that they are able to not only recite in detail but to illustrate movements on the black board.

(b) Details of the Schools of the Soldier and Squad slurred over and men permitted to execute them entirely wrong or in a slip-shod and slovenly manner. I repeatedly observed movements executed in this way without any effort by the instructor at correction. Repeatedly, almost uniformly I might say, instructors seemed to think their full duty done when they gave a command and their next duty to be the giving of another command for another movement. This method, it is felt certain, is the result in most cases of lack of knowledge by the instructor of the details of the movement and his consequent inability to explain how to execute them correctly. In other cases it is due to the failure of the instructor to appreciate the importance of repeating the movement indefinitely until correctly executed. It is far better to spend the entire drill time on two movements to insure their correct execution than to proceed with a dozen incorrectly executed ones under the fond delusion that drill is being held.

The remedy, then, is first, that ALL, instructors, both officers and N. C. O's. but more particularly officers, learn the details of drill so thoroughly that they can explain them and, second, that they never pass from one movement to another until the first one is correctly executed. In doing this, an entire organization should not be worn out and nagged with one movement because of the backwardness of a few men. In these cases few men should be segregated and given special instruction by specially competent instructors.

(c) Lack of care of property, particularly in cleaning and accounting therefor, permitting men to wear parts of the uniform, issued to them, in pursuit of their civil occupations, and failure to require that rifles and metal parts of the equipment be kept free from rust.

The remedy lies in a greater personal attention of officers to these matters. You all KNOW your duty in respect to these things but too many of you simply fail to do it. The infantryman who permits his rifle to get rusty, and particularly the one who permits it to remain so a minute longer than he can get to work on it, should consider himself disgraced, and the officer, in turn, who fails to satisfy himself by proper and frequent inspection that his rifles are clean and well kept belongs in the same category. There can be absolutely no excuse for dirty or rusty rifles under conditions of armory service. Yet I found a lot of them in both conditions.

The Property and Disbursing Officer will doubtless address you on the details of the subject of property, including its care, preservation and accounting.

I, however, desire to invite your attention to the all too common practice of men using issue uniform in their civil occupa-

tions. This is forbidden by competent authority. Civil pursuits (many of them) are quite as honorable as soldering, but just the same the wearing of the uniform upon occasions or by persons not intended tends to cheapen it and, in some cases, bring it into disrepute. Aside from the disobedience of orders involved and the cheapening just alluded to is the further fact that the practice results in direct public loss. The man who wears out a government shirt, pair of shoes or breeches in his private business simply turns them in and is issued replacement. This is a good thing for the man but mighty poor business for the government. Some officers apparently lack both the sense of duty and the nerve to put a stop to the practice among and by those with whom they have to live in a small community.

The remedy is so evident that I shall not mention it.

(d) Morale is vital and fundamentally necessary. In some organizations it is splendid; in some only fair; while in others there is scarcely any. Morale in the military establishment has been variously defined and is variously understood by different persons. A definition that is perhaps as suitable as any other is that it is pride of organization. You understand, or should, quite as well as I do what factors are necessary to that pride but it will not be amiss to mention, among the many, the cardinal one of efficiency. Indeed, the terms "efficiency" and "morale" in the military establishment are so intimately related that they are practically interchangeable. I have never known an efficient organization that did not have fine morale nor one that had good morale that was not efficient, or, if new, that was not in the way of being rapidly made efficient. An outfit whose officers and N. C. O's. do not know and execute the details of their grades; whose drill is slovenly; whose absentee list is habitually large and mostly composed of the same men; which is usually tardy and about which superiors are always just a bit uneasy—such an outfit is evidently without good morale and, hence, efficiency.

The remedy lies (1) in having officers whom the men respect; (2) who have the "officer" point of view; (3) who know the details of their grades; (4) who conscientiously and at all times perform those duties; (5) who have good understanding of human nature and an interest in the welfare of their organizations quite aside from the purely military view point; (6) who will not hesitate to clean house by disciplinary measures when necessary, particularly in getting rid of guard house lawyers, habitual absentees, and other undesirables. A large book could easily be written on the general subject but there is neither time nor necessity for further discussion thereof on this occasion. Suffice it to say that the matter is fundamental—is vitally important—and that if the officers fulfill the conditions just referred to they will be so efficient that organization morale will follow without further suggestion from any source. Officers must have good help and voluntary co-operation from their men or they cannot have efficient organizations. This is particularly true in the Guard. But at the same time it is generally true that organizations are exactly what their officers make them—no better nor no more inefficient.

(e) Proper supervision by higher commanders is vitally im-

portant. In states where entire battalions, or even larger units, are stationed at one place this is an easy matter to accomplish but in the State where no more than one company of any battalion is station at one place and where state appropriations are small it is a matter of great difficulty. It is fully realized that field officers engaged in the business of earning a living in civil life can rarely find the time to visit their various units as frequently, perhaps, as they would like. Likewise, such visits, in the absence of sufficient appropriations, entail expense that all cannot perhaps afford. Still the facts remain that all units are not in all cases visited by their field officers as frequently as they should be, and that these field officers voluntarily accepted appointment with full knowledge of their duty and responsibility. It is a hard nut to crack but those who gathered the units ought to crack some of them more than once a year in this 15 day camp.

The detailed value of such visits and proper supervision is so evident to all concerned that it would be only a waste of time to refer to the subject at greater length. I will simply add that all field officers will be highly gratified to see the enthusiasm aroused in their organization by their knowledge of the interest of the "Old Man" in them as thus displayed by occasional personal visits.

Subordinates expect to be actively commanded. They expect their commanders, particularly their field officers, to both know and exercise the functions of their grades. This is not to say that they expect either meddling or nagging, but just as surely as those officers fail to exercise their function and display personal interest just that surely will their subordinates cease to regard them as real commanders. Thus, let the majors of both battalions and machine gun units keep actively in touch with their training and other activities by personal visit when possible but most certainly at all times by correspondence. Similarly, it is even more important that the colonel impress his personality on his regiment. All units and officers must feel that the colonel is actively interested not only in their training but also in every thing of every nature that affects the regiment. Personal contact, of course, is highly desirable to this end and at least two visits to each unit should be made each year. These visits should be supplemented by various forms of correspondence. All should KNOW—not merely feel—that the colonel knows the state of training and what is going on in each unit, and they should further KNOW that he will not only command, encourage, and reward in all cases deserving such action but just as surely admonish and punish in others when it is his duty to do so. If all field officers will assume this attitude and if all subordinates recognize that they are commanded by men of knowledge, courtesy, and a high sense of fairness, then we will have model organizations.

Let me reiterate—Military persons like REAL commanders, not figure heads.

Pursuing the train of thought further, it is, or should be, the duty and one of the main functions of the Adjutant General of the State to endeavor (1) to obtain sufficient appropriations to enable field officers to make these visits and (2) to then see to it that they make them and render reports to his office of the result thereof, together with recommendations.

(f) It has repeatedly happened that an officer about to leave the service has turned over command of his organization to his successor without making any proper effort to check up his property, turn it over, fix responsibility for lost or damaged articles, or clear his papers. In fact, there are several such instances pending now. The result is interminable delay, great confusion, a most unfair and unsatisfactory condition of affairs to the successor, and, in some cases, loss to the United States or the State of Florida. That sort of thing is absolutely indefensible and wholly inexcusable. Public office is a public trust. We all know what we think of men who violate private trusts. It is even more derogatory to violate public ones.

The cause, in its origin, lies in a lack of a proper sense of duty of the officer. In point of detail failure happens about as follows: (a) To enter items on property loan cards, with resulting lack of knowledge of actual original responsibility; (b) To enter proper credits and charges on Forms 637, which show responsibility of individuals for articles issued them; (c) To balance property on Forms 637 and in store room against total responsibility; (d) To personally, or through proper subordinates, cause men to bring articles issued them and charged on Forms 637 to armory at proper intervals for actual count; (e) To charge missing articles thus determined against men; (f) To promptly report articles missing from store room and institute survey proceedings; and (g) Somewhat after the fashion of an ostrich when hiding his head in the sand, then ducking the final issue at turn-over time.

The incoming officer is required to sign for only what he finds. It is not his duty to hunt around for either the property or the losses of the other man. It is the bounden duty of the outgoing officer to have his property in shape for turning over, to turn it over by actual count, and to AT ONCE clear up all discrepancies in the manner provided by law. Men in civil life are held to such a rule. Why not in military life? I have personal knowledge of the worry and trouble such things have caused your Adjutant General and of his deep interest in the matter. It is idle to say either that such a state of affairs should be permitted to continue or that a system cannot be instituted to put a stop to it. The proper office should at once institute a system that will accomplish the desired result, even if extreme measures have to be resorted to. It is to be remembered that officers are quite liable to arrest and punishment as enlisted men for willful delinquency or neglect of duty.

In many cases there is entirely too much delay in answering communications and rendering required reports. Also, some few have pronounced tendency to split hairs as to the meaning and requirements of orders and instructions or, in some cases, even of the provisions of the statute law. When in doubt, obey what the mind of the ordinary man would conceive to be the spirit of the instructions—the evident intent of the authority issuing them—even if the language is not quite as plain and absolute as it might have been.

(h) Then, too, some officers have entirely too much of an inclination to "pass the huck" to superiors in matter which from one reason or another they do not wish to handle. They

are afraid of responsibility or their neighbors. This is particularly true in disciplinary matters. Both the law and the best military practice of all time contemplate that all officers should exercise the full authority of their grades and assignments and only refer matters of any kind to superiors when they cannot—not "prefer not"—handle them themselves within the law. Any other course is bound to weaken their authority, decrease respect of subordinates, and unnecessarily add to the work and records of superior authority. Really good officers—those with the germ of real commanders in their make up—will never thus avoid their plain duty.

Thus I might continue on, point by point, at much greater length but, as before stated, it is thought that these few items illustrate the subject sufficiently well and will serve to induce proper consideration by yourselves along the same general lines, together with application of necessary remedies.

Pray do not draw the conclusion that I have come only to find fault and criticise. Such is far from my attitude or purpose. I have already taken opportunity to express my sympathy with your difficulties and problems; my appreciation of your enthusiasm and, in many cases, personal sacrifice; and my admiration for what you have accomplished under handicaps of various kinds. I can only add the statement that the Regular personnel on duty here will use the utmost endeavor to be of kindly assistance to you. Certainly we will point out faults as we see them but will try to do so in a kindly and helpful way and our suggestion will be purely advisory. If any member of said personnel adopts any other attitude at any time I will be very greatly obliged for quick and direct report. We have no authority in any way in the sense of giving orders, nor do we wish it. You are your own commanders and we are here to assist, advise, and report results.

Please, also, do not draw the conclusion that I think the Guard of Florida in poor condition, either so far as it itself is concerned or by comparison with that of other states. Such is not the case. We have some organizations that, when I last saw them, any Regular regiment might be proud to claim. Many of the others are good. Not more than two or three are so much below par that they can properly be termed bad or even poor. We have many highly efficient officers and only a very few who could really be termed poor. But since we DO have a few poor officers and organizations we might as well be honest enough and loyal enough to the best interests of the Guard as a whole not only to admit the fact but also to recognize that the admission must necessarily precede any real effort to either improve them or get rid of them.

But I wish to again express the deliberate opinion that you have accomplished wonders under you conditions of service. You have produced an organized force of much real efficiency and one that both the State and the nation can rely on in case of need. You have the spirit and the will to serve. These are the two greatest essentials. Defects of training and opportunity can be, and are being corrected. I have not been on duty with the Guard of any other state for some years but I nevertheless have information concerning many of them. From this knowledge I can assure you that it is my belief that the Guard

of Florida is in better shape than the average and need not blush at comparison with the best. Most certainly I think it at least the equal of any in the Corps Area.

Now you may be wondering all, or much, of this somewhat lengthy discourse has to do with the Training Programs I set out to discuss. Let us see. You have the Programs in your hands. Their terms are plain and specific. They need no explanation except, perhaps, as to why they are so simple. There is an intimate relation between the remarks just made and the character of these Programs. You may recall that I stated that simplicity and thoroughness in fundamentals—the small basics—were my guiding thoughts in the preparation of both Programs. And again, generalizing, that in my opinion your faults of training and methods of administration were primarily due to lack of thoroughness. The "thoroughness" I had in mind was that relating particularly to fundamentals—small items—and without which thoroughness in larger things cannot be expected. The faults and defects alluded to are faults and defects of THOROUGHNESS. THOROUGHNESS is very largely a matter of training. Some are naturally more thorough than others but the influence of training cannot be denied. If we are thorough in small things, particularly if those small things are of fundamental importance, then we have acquired such a method, such a habit, that the chances are we will be thorough in larger matters. If the small things are of fundamental importance and are neglected or stirred over then it is almost certain that larger ones will be handled in the same way. Look about you in your business lives and you will quickly recognize that you do not wish a man in your employ who is not thorough in the performance of the small things of his duty. You certainly will not advance such a man to larger responsibility over the head of one who does small parts of his duty thoroughly. So it is in the military life also.

The two Programs speak for themselves. You have them and it hardly seems necessary to enter into any discussion of their details further than to say that they were deliberately built up about the idea of making you THOROUGH in both the learning and doing of the small things of soldiering. Thus you will note that the part of the camp Program relating to tactical training lays special emphasis on Bayonet Training and the Schools of the Soldier, Squad, and Platoon. In the armory Programs the same things are emphasized, together with inspection at each formation for cleanliness and adjustment of arms and equipment, certain other inspections in full field equipment, the training of specialists, and the holding of schools.

Neither of the Programs is fancy or showy. Some of you may not be satisfied with their simplicity. But it is my deliberate opinion that solid and thorough grounding in the A. B. Cs of soldiering is what you most need. Don't mind the monotony of the work. It will be good for you. Grin and go through with it in the knowledge that the scheme provided is just what you need. Besides, there is considerable diversity.

As a final word, let me suggest that you make a sort of fetish of the word THOROUGH. Talk it. Think it. Dream it. Be it. Be satisfied with nothing less. If you do this, then by next camp time you will find yourselves with well trained, smooth work-

ing machines of high morale that are ready for more advanced training. Not only this, but you will find that recruits joining such organizations quickly and naturally drop into the company habit and can be made ready to take their place in ranks in half the time of other days and other ways.

EXHIBIT "B"

**HEADQUARTERS
ONE HUNDRED FIFTY-FOURTH INFANTRY
FLORIDA NATIONAL GUARD**

25 August, 1922.

Subject: Report, Machine Gun Training, Camp Joseph E. Johnston, Florida.

To: The Commanding Officer, 154 Infantry.

1. The following report of machine gun training for Companies "B," "H" and "M," 154th Infantry during the period August 5th to 18th, 1922, inclusive, is submitted:

Instruction: The following subjects were handled with the results shown opposite each:

Elementary Drill	Excellent
Combined Drill	Excellent
Rough Ground Drill	Excellent
Tactical Squad Drill	Very Good
Fire Control Instruments.....	Very Good
1000" Range Firing	Excellent
Field Firing	Excellent
Night Firing	Excellent

Record Practice: In the record firing the following results were obtained:

Number of Men Firing			Total
Officers and Enlisted	Co. "D"	Co. "H" Co. "M"	
	37	61 53	151
Machine Gun Experts			
	Co. "D" Co. "H" Co. "M"		
	5 5 2		12
Machine Gun Sharpshooters			
	Co. "D" Co. "H" Co. "M"		
	5 15 3		23
Machine Gun Marksmen			
	Co. "D" Co. "H" Co. "M"		
	9 16 17		42
Total Qualified ...	19	36	22
Total Percentage..	51%	59.5%	41.65%
			77
			51%

A total of 181,500 rounds of ammunition was expended.

The showing made during the Record Firing is considered excellent.

Experts:

Co. "D"	Co. "H"
2nd Lieut. Frank Losaing	2nd Lieut. Thos. M. Crouch
Sgt. Walter Connelly	Sgt. Iris S. Garner
Sgt. Garland W. Spencer	Sgt. Harry Edwards
Cpl. John T. Brady	Sgt. R. B. Harkness
Pvt. Geo. M. Townsend	Cpl. Jim Riviers
Co. "M"	
Cpl. John H. Allen	Sgt. E. M. Mountain

Night Firing: A problem was fired at night as a demonstration for the Governor of Florida. The firing was excellent for the men and was highly spectacular. It was carried out with four Browning machine guns, firing "live and Tracer" ammunition "three to one" without a stoppage. A total of 4000 rounds of ammunition was expended.

Ranges: The 1000" range recently installed is in excellent condition and it was due to this and the general good condition of the "A" range that it was possible to fire the entire battalion through the record practice course.

Officers: The officers on duty with these organizations, with but two exceptions, are above the average. The company commanders are highly efficient.

Enlisted Men: The enlisted personnel of these organizations are well above the average. Their "Esprit" is excellent and their "morale" high. Their attention to details of uniform and to military courtesy is excellent.

The "Cup" for company excellence in machine gun fire was awarded to Co. "H."

Recommendations: That organization commanders requisition at once all the spare parts, barrels and tools that the "Tables of Allowances" will allow and have the equipment of each gun and the spare parts boxes complete. That company commanders instruct all non-commissioned officers in the use of fire control instruments. That a larger "Cup" or trophy be secured for excellence in company machine gun fire and the present Cup be made trophy for individual fire.

CHESTER H. WILSON,
Major 154 Infantry,
Regimental Machine Gun Officer.

**MEDICAL DETACHMENT 154TH INFANTRY
SANFORD, FLORIDA**

File 47.
29th October, 1922.

From: Ralph E. Stevens, Major M. C.

To: The Commanding Officer 154th Infantry.

Subject: Report Regimental Surgeon, 154th Infantry F. N. G.

1. The Medical Detachment, 154th Infantry, F. N. G., located at Jacksonville, Florida, was disbanded by S. O. 54, A. G. O., May 8th, 1922, and reorganized and stationed at Sanford, Florida, by authority from the Military Bureau, dated May 2nd, 1922. On approval of Regimental Commander, Capt. Ralph E. Stevens, M. C., was assigned to command the detachment in the absence of the senior medical officer.

The personnel of the detachment was enlisted during March and April and the first recognized drill was held May 11th, 1922. The Commanding Officer was made Regimental Surgeon, July

15th, 1922, when Major James B. Griffin, of St. Augustine, resigned. This was learned with regret as Major Griffin was a most competent officer and a fine soldier and it was a pleasure to serve under him.

By the time we were called to camp, the organization had made wonderful progress due to the fact that the non-coms were experienced and the men were eager to learn.

The Medical Detachment made a fine record in camp due to the co-operation of the line officers in the regiment was 100 per cent inoculated for typhoid and 100 per cent vaccinated against smallpox before leaving camp. This record was only made possible by the splendid co-operation of the State Health Officer, travelling officers of the State Board of Health Inoculating and vaccinating many companies before they came to camp.

The two weeks in camp were most trying for the Medical Detachment and made both officers and men extend themselves to the limit. At the time of the encampment, the State was in the midst of an epidemic of Influenza (mild type) and Dengue fever.

Sick call was exceedingly large, ranging from fifty to one hundred and fifty men on sick call each day, having a total of 1,900 on sick call during the two weeks in camp. The Regimental Infirmary was thrown into a hospital and an average of twenty beds were occupied during the period of encampment. These men were cared for and fed by enlisted personnel of the detachment and considering the detachment a new organization, these men more than did themselves proud.

The Regimental Surgeon was greatly handicapped by being short one Medical Officer, also one Dental Officer was sick in camp during the period of the encampment.

The sanitation of the camp was excellent. Camp grounds had been cleaned, all grass cut, barracks cleaned, toilets and wash houses put in good condition before troops entered camp.

Prophylaxis was given at Regimental Infirmary both day and night and from the advantage taken of it the men must have been well instructed by their company commanders.

Experience at this camp showed the necessity of having the following completed before camp next year:

1. Completion of all inoculations and vaccinations.
2. Renovating of hospital wards and the purchase of twelve hospital beds.
3. Installation of a small range in hospital to be used to cook food and furnish hot water for the patients.
4. The cleaning of all barracks and cutting down of weeds and grass a few days before troops enter camp.

RALPH E. STEVENS,
Maj. M. C., Regt'l. Surgeon.

THEO. A. BLINN,
Capt. M. C., F. N. G.

Jacksonville, Fla., September 25th, 1922.

The Adjutant General, State Arsenal, St. Augustine, Florida.
Report of Firing, August Camp, 1922.

1. In compliance with General Order No. 4, State of Florida, May 5, 1922, the following report of firing during the August, 1922, Field Training Camp of the 154th Infantry and attached Units is submitted.

2. The consolidated Regimental report of classification, Rifle Firing of the 154th Infantry, Form 506, A. G. O., is submitted herewith. It will be noted that there were qualified thirty-five expert riflemen, thirty-three sharpshooters and eighty-eight marksmen.

3. The individual high score in both slow and rapid firing was won by Captain Preston Ayres of Company "K."

4. Company high score was won by Company "F," 154th Infantry. This company qualified ninety-one per cent of the men firing. This record is believed to be due to the preliminary training which was given the company for several months preceding the camp at the Armory and practically every Sunday during this period on the rifle range.

5. Schedule of firing dated August 7, 1922, and memorandums with reference to work on the range, dated August 7th and August 9th, 1922, were prepared and copies are submitted herewith.

6. All firing was placed in charge of Lieut. Col. Vivian B. Collins with Captain George Coslick as range officer and Captain J. L. Ballard as instructor. The Regimental Commander desires to commend most highly the efficient and untiring work of these officers and also the cordial co-operation of the Battalion Adjutants of the pit details.

7. The first three days were devoted to preliminary training under the direction of the company officers and instructors. Following the preliminary training, the entire course was fired in six days, this for the reason that the camp program allowed only two battalions on the range each day with pit details furnished from such battalions. The record course was hurried through in two days. An average of ten hours a day was required to complete the program and with the intracted pit work requiring eleven hours a day, the interest of the riflemen was lessened and was evidenced in the final results.

8. That no more men completed the preliminary instruction was due to the fact that on account of a great deal of sickness in the command, a large number of rainy days and other lack of time, there were but seven full shooting days. Taking into consideration the very adverse conditions of sickness, rainy weather and lack of time, it is believed that the record made by the regiment is very credible.

9. The rifle range was in splendid condition. Too much credit can not be given to Major J. H. Spengler, Camp Quartermaster, for his excellent and most efficient work in the preliminary preparation of the range.

10. Reports of individual classification and rifle practice were submitted by each company. These were checked by the officer in charge of firing and returned to the company commander for fire.

11. As the result of this firing program, it is believed to be highly inadvisable to attempt to fire Course "A" during the period of a fifteen day camp. It is practically impossible to adequately fire this course in the limited time permitted. Further it is believed to be essential that each company make a special effort to train good coaches, that all preliminary instruction be given and that the instruction course be fired by all troops before coming to camp. It is also believed to be desirable for the best interests of the troops that work on the rifle range and in the pits be limited to a maximum of eight hours per day.

R. C. TURK,
Col. 154th Inf., F. N. G., Comndg.

APPENDIX D

EXECUTIVE OFFICER,
STATE RIFLE COMPETITIONS,
CAMP JOSEPH E. JOHNSTON, FLA.

August 23, 1922.

To: *The Adjutant General of Florida.*

Subject: *Report of the Executive Officer.*

1. In accordance with the authority contained in par. 4, S. O. 117, A. G. O. Fla., c. s., the undersigned assumed command of the State Rifle Competitions, at Camp Joseph E. Johnston, Fla., August 19, 1922.

2. The following named officers reported and were assigned to their respective duties:

Major Jacob H. Spengler, Q. M. C., Camp Quartermaster.

Major Ralph E. Stevens, M. C., Camp Surgeon.

Captain George M. Coslick, Ord. Dept., Range Officer.

Captain Bernard L. Rhodes, 154th Inf., Adjutant.

Captain Cramer B. Potter, 154th Inf., Range Officer.

3. Teams from the following organizations of five men each reported as competitors for the Taliaferro Trophy Match and as individuals for places on the National Match Team:

Co. "A" 154th Infantry, Daytona, Fla.

Co. "C" 154th Infantry, West Palm Beach, Fla.

Co. "E" 154th Infantry, Live Oak, Fla.

Co. "F" 154th Infantry, Jacksonville, Fla.

Co. "I" 154th Infantry, Tarpon Springs, Fla.

Co. "K" 154th Infantry, Orlando, Fla.

Co. "L" 154th Infantry, St. Petersburg, Fla.

A number of individuals also reported as competitors for places on the National Match Team.

4. Course "A" as laid down in Rifle Marksmanship, W. D. 1021, was the course prescribed for the Taliaferro Trophy Match, which was fired August 19 and 21, with the following results:

Co. "A" 1407	Co. "F" 1369
Co. "C" 1402	Co. "L" 1291
Co. "K" 1391	Co. "I" 1220

Co. "E" withdrew before the match was completed.

5. Co. "A" was awarded the Taliaferro Trophy. The excellenee of the shooting in this match can only be appreciated by comparing the scores of the 1921 match with the scores of the match just fired. The winning team in 1921 shot 72%, while the winning 1922 team shot 80%, and the lowest team to finish the match shot 70%.

6. On August 22 and 23 the individuals who were competing for places on the National Match Team fired over the same courses the teams who fired for the Taliaferro Trophy. At the close of this firing the National Match Team was selected from the high men of the four days' firing. Following is the team which was selected to represent the Florida National Guard, at the National Matches, to be held at Camp Perry, Ohio, September 2, 1922, to September 28, 1922, inclusive:

Major Chester H. Wilson, 154th Infantry, Team Captain.
 Captain George M. Coslick, Ord. Dept., Team Coach.
 Captain Charles H. Holstlaw, Co. "C" 154th Infantry.
 Captain Cramer B. Potter, Co. "L" 154th Infantry.
 Captain Charles W. Bunker, Co. "F" 154th Infantry.
 Sgt. James E. Byrd, Co. "F" 154th Infantry.
 Sgt. Walter R. Braren, Co. "A" 154th Infantry.
 Sgt. Donald G. Graves, Co. "L" 154th Infantry.
 Sgt. Royce Crum, Co. "I" 154th Infantry.
 Cpl. George S. Rowley, Co. "C" 154th Infantry.

Cpl. Cecil R. Williams, Co. "A" 154th Infantry.

Pvt. 1st Cl. Cecil R. Harper, Co. "C" 154th Infantry.

Pvt. Roy Crain, Co. "K" 154th Infantry.

Pvt. Andrew Link, Co. "K" 154th Infantry.

7. The shooting as a whole was satisfactory, but the fact that only seven teams competed would show a lack of interest on the part of certain Company Commanders in rifle shooting.

Recommendations: That all Company Commanders be required to enter a team in the State Rifle Competitions. That an effort be made to secure funds from either the Federal or State governments to assure the Rifle Competitions for 1923.

CHESTER H. WILSON,
Major 154th Infantry.

APPENDIX E

**HEADQUARTERS
NATIONAL MATCH TEAM,
FLORIDA NATIONAL GUARD,
CAMP PERRY, OHIO.**

September 29, 1922.

To: *The Adjutant General of Florida.*

Subject: *Report of Team Captain.*

1. In accordance with the authority contained in S. O. 119, A. G. O., Fla., e. s., the undersigned assumed command of the Florida National Guard Rifle Team, selected to represent Florida at the National Matches, Camp Perry, Ohio, August 31, 1922, at Jacksonville, Fla.

Captain George M. Coslick, O. D., Team Coach.

TEAM MEMBERS.

Captain Charles H. Holstlaw, 154th Infantry, Co. "C."
 Captain Cramer B. Potter, 154th Infantry, Co. "L."
 Captain Charles W. Bunker, 154th Infantry, Co. "F."
 Sgt. James E. Byed, 154th Infantry, Co. "E."
 Sgt. Walter R. Braren, 154th Infantry, Co. "A."
 Sgt. Donald G. Graves, 154th Infantry, Co. "L."
 Sgt. Royee Crum, 154th Infantry, Co. "I."
 Cpl. George S. Rowley, 154th Infantry, Co. "C."
 Cpl. Cecil R. Williams, 154th Infantry, Co. "A."
 Pvt. 1st Cl. Cecil R. Harper, 154th Infantry, Co. "C."
 Pvt. Roy Crain, 154th Infantry, Co. "K."
 Pvt. Andrew Link, 154th Infantry, Co. "K."

2. The team entrained at Jacksonville, Fla., August 31, 1922, and arrived at Camp Perry, Ohio, September 1, 1922. The team was assigned quarters and supplies were issued the evening of September 1st. September 2d and 3d were

given over to drawing and cleaning rifles and to getting settled in camp.

3. On September 4th the Small Arms Firing School opened and continued until September 11th. The entire time was given over to range practice and the Team Captain and Coach given an opportunity to know his men and to learn what they needed to improve their shooting. The training was very beneficial to the Florida team, and the following men qualified and received certificates as Instructors:

Major Chester H. Wilson, 154th Infantry.
Captain George M. Coslick, Ord. Dept.
Captain Cramer B. Potter, 154th Infantry.
Captain Charles H. Holstlaw, 154th Infantry.
Captain Charles W. Bunker, 154th Infantry.
Sgt. James E. Byrd, 154th Infantry.
Sgt. Royce Crum, 154th Infantry.
Sgt. Walter R. Braren, 154th Infantry.

4. The matches of the National Rifle Association opened September 12, 1922. The team fired individually in the following matches:

The Leech Cup Match.
The Marine Corps Cup Match.
The Wimbledon Cup Match.
The N. R. A. Off Hand Match.
The President's Match.

A team of six men were entered in the following team matches:

Championship Regimental Team Match, finished seventeenth place.

Enlistment Men's Team Match, finished seventeenth place.

A. E. F. Roumanian Cup Match, finished fourteenth place.

A team of eight men were entered in the Herrick Trophy Match and finished in twenty-third place.

The men shot well in all of these matches and gained experience under match conditions which is necessary for the new shooter to have before he enters a National Match.

The National Individual Match was fired on September 21st and 22d, the entire team firing this match. The following men qualified as Expert Riflemen:

Major Chester H. Wilson.
 Captain George M. Coslick.
 Captain Cramer B. Potter.
 Sgt. James E. Byrd.
 Sgt. Donald G. Cravens.
 Sgt. Royce Crum.
 Sgt. Walter R. Braren.
 Cpl. George S. Rowley.
 Cpl. Cecil R. Williams.
 Cpl. Cecil R. Harper.
 Pvt. Roy Crain.
 Pvt. Andrew Link.

The National Team Match was fired September 27th and 28th, with fifty teams competing. This team finished in twenty-first place with an aggregate score of 2,683 (possible 3,000), a percentage of 89.5. The individual scores were as follows:

	200	600	1000	200	300RFTotal
Pvt. Roy Crain.....	43	43	93	49	49 268
Pvt. Andrew Link..	44	49	91	49	59 282
Sgt. W. R. Braren..	39	45	87	45	48 264
Cpl. C. R. Williams.	42	44	86	46	47 268
Cpl. G. S. Rowley..	42	45	89	48	48 272
Pvt. C. R. Harper..	40	45	86	47	59 268
Capt. C. B. Potetr..	41	44	84	48	50 267
Sgt. D. C. Graves...	47	46	76	48	49 266
Sgt. Royee Crum ...	41	45	82	49	48 265
Sgt. J. E. Byrd.....	46	48	76	48	48 266
 Totals.....	425	454	850	476	478 2683

This showing is very good and is probably the highest percentage ever shown by a team from the Florida National Guard.

5. The team was quartered in tents, four men to the tent, and were very comfortable. The mess conditions were very good, the food was of a good quality and was plentiful.

Recommendations: That Company Officers be instructed to inform their men of the possibilities of shooting on the State Team and to make it possible for men who wish to try for the team, to shoot on their home ranges as often as possible. That Company Commanders make use of the men who have shot on National Match Teams as Instructors. That at least two star gauge rifles be issued to each infantry company, to be used by those men who wish to try for a team.

CHESTER H. WILSON,
Major 154th Infantry.

APPENDIX F

**HEADQUARTERS
116TH FIELD ARTILLERY
TAMPA, FLORIDA.**

November 14, 1922.

To: *The Adjutant General, St. Augustine, Fla.*
Subject: *Report of Encampment.*

1. In compliance with letters dated November 10, 1922, St. Augustine, Fla., I wish to submit report of encampment of 116th Field Artillery, Florida National Guard, Camp Bragg, N. C. .

2. The encampment began July 24th and ended August 7th, 1922. The following organizations were present:

Strength and Attendance—

Battalion Headquarters,
Major Sumter L. Lowry, Jr., commanding.

Hdqrs. Detch. and Combat Train,
Capt. John H. Hedrick, commanding.

Battery "A,"
Capt. Claibourne Phipps, commanding.

Battery "B,"
Capt. Wm. E. Hammer, commanding.

Battery "C,"
Capt. Homer W. Hesterly, commanding.

Medical Détachment,
Capt. John Halliday, commanding.

A total of 16 officers and 324 men were present in camp. Ninety per cent of the total officers and enlisted strength of the battalion were present for duty on the opening day of the camp. Battery "C" made the remarkable showing of having 96 per cent of its strength in attendance at camp.

Drill Schedule—

It was decided to have the four batteries take over the equipment, material, and animals used by a Regular Army Battalion of Field Artillery. This was done on the second day in camp. The regular routine of care of animals and material was gone through with each day and constituted a large part of the training and instruction received by the battalion.

For the first week of the encampment the drill schedule was confined to standing gun drill and harnessing and un-harnessing, equitation and drills preliminary to duty on the range. The last four days of camp were spent on the range in actual firing by each battery. The various officers were given an opportunity to fire problems and the gun crews became very proficient in the handling of their pieces before the four days' firing ended. Excellent results were gotten, both for the officers and enlisted men with the range problems. No battalion parades or reviews were held.

Method of Instruction—

The method of instruction used at this camp was of the very best order. Three Regular Army lieutenants were assigned to each battery to assist in the instruction of the men. These officers were constantly on duty with the troops and rendered very valuable service, each officer being specialized in some particular phase of the work within the battery.

Material—

The material as furnished by the authorities at Camp Bragg was in excellent condition. The horses were fair, but were of sufficient quality to give proper instruction.

School—

An Officers' School was held each day for an hour and a half and all officers were required to attend these classes, which proved very beneficial and instructive.

Sanitation and Hygiene—See report of Surgeon.

Discipline and Courtesy—

Military discipline and courtesy were insisted upon at all times and a wonderful improvement was noted from the time the men arrived in camp until their departure. Officers and men were required to dress neatly at all times and were taught the proper military salutes and customs of the service.

Esprit D'Corps—

One of the features of this camp was the fine spirit evidenced by the entire battalion. The men felt that they had an organization to be proud of and tried in every way to make a good reputation and impression on the authorities at camp. Friendly rivalry and competition among the various batteries was fostered in every way; each battery trying to outdo the others in matters of athletics, drill, sanitation and general appearance. The morale of the troops was excellent on leaving Tampa and in no way diminished during the camp.

Messing—

Food and messing conditions were above the average and the well ordered system used by the camp authorities made it possible for the mess sergeants to secure the very best food at all times.

Play—

A battalion athletic officer was appointed who arranged a series of athletic contests, which took place in the afternoon of each day. These games and contests were participated in by each battery and the competition was very keen.

Summary—

In my opinion, the first artillery camp attended by the Florida National Guard, was a big success. The men received military training of real value, given in such a way that they enjoyed and took interest in their work. The atmosphere of the camp was clean and wholesome. There was a noticeable lack of rowdyism and the general conduct of the men reflected credit on our State. The schedule was full, but the men were not overworked and were given plenty of time in which to play and really feel that their camp had been a summer vacation as well as a period of instruction. The regular army instructors, both from the camp and from our State, rendered valuable and efficient service. It is my firm belief that this camp will be of inestimable value to the future military operations of the field artillery in this State.

SUMTER L. LOWRY,
Lt. Col. 116th F. A.

APPENDIX G**437TH COMPANY COAST ARTILLERY CORPS
FLORIDA NATIONAL GUARD
JACKSONVILLE, FLORIDA**

September 7, 1922.

To: *The Adjutant General of Florida.*

Subject: *Annual Encampment, 1922.*

1. The following is a report of the fifteen day camp of instruction held by the 437th Company Coast Artillery Corps, Florida National Guard, at Fort Monroe, Virginia, from July 8, 1922, to July 22, 1922, inclusive.

2. This organization entrained at Jacksonville at 8:45 a. m., July 7, 1922, and arrived at Fort Monroe at 10:00 a. m., July 8, 1922. The camp was composed of the following National Guard organizations: Two companies from North Carolina, two companies from South Carolina, and one company from Florida. Major C. T. Marsh, Senior Instructor 4th Corps Area, had preceded these organizations to Fort Monroe and had made all suitable arrangements, having everything in readiness upon arrival of troops. Suitable barracks were furnished both enlisted men and officers. The first day was devoted to preparing camp, drawing rations, preparation of manning tables and drill schedules.

3. Regular instruction began at 7:30 a. m., July 10, 1922, consisting chiefly of Artillery Instruction, the entire first week being devoted to nomenclature, drill and duties of the range section at a 12 inch disappearing rifle battery. These instructions were under the direct supervision of Major C. T. Marsh, Senior Instructor, Captain Phillips, U. S. A., and two Regular Army sergeant instructors. Marked progress was made the first day, after four days' drill and instruction, sub-caliber target practice was held for three

days, preparatory to service target practice. One day was devoted to the preparation of service target practice, i. e., adjusting breech-block guns and mechanism of gun, cleaning and oiling projectiles and preparing powder charges. The service target practice was conducted in a very orderly and highly satisfactory manner, and the work and conduct of this organization was highly complimented by Col. Mitchell, Coast Defense Commander, and other Regular Army officers observing the firing.

4. Athletics and entertainment was not forgotten. A field meet was held in which this organization made a very creditable showing. The local American Legion Post gave a smoker and entertainment for the entire National Guard Camp, a very enjoyable affair. The Liberty Theatre showed motion pictures every night.

5. The officers and enlisted men of this organization are high in their praise for the consideration, invaluable instructions and good time afforded them by both the officers and enlisted personnel stationed at Fort Monroe, and an unanimous vote was given that the 1923 annual encampment would be held at Fort Monroe. At this encampment this organization took ninety-four enlisted men and three officers, and it is the desire of the Company Commander to take a company of maximum strength to the 1923 encampment.

MAYRE R. WOODWARD,

Capt. C. A. C., F. N. G.,
Comdg. 437th Co. C. A. C.

APPENDIX H**ASSISTANCE TO CIVIL AUTHORITIES
EXHIBIT A**

To: *The Adjutant General, State Arsenal, St. Augustine, Florida.*

Subject: *Report on the Guarding of the Duval County Jail.*

1. At about five-thirty p. m. on Thursday, April 20, 1922, the Post Commander received verbal instructions from the Adjutant General to get into communication with the Sheriff of Duval County and to provide such military guard for the Duval County Jail as might be necessary to protect the building and prisoners. Captain George Garcia of "F" Company was immediately notified. Shortly after six o'clock, the first soldiers were on duty at the jail. By seven o'clock an adequate guard had been provided.

2. In view of the gravity of the situation, approximately forty-five members of "F" Company with two officers, Captain George Garcia and First Lieutenant Fred Safay, were ordered to duty. In addition, two sections of the Howitzer Company with two 37 mm. guns and approximately eighteen men under command of Captain Robert Towers were also ordered on duty at the jail. The Post Commander took personal charge of the situation during Thursday night.

3. An area extending one block in each direction from the jail was strongly posted and also covered by combat patrol. The two 37 mm. guns were posted at two corners of the jail and criminal court buildings and covered by infantry and by automatic rifles. A guard of four men and two sergeants was also provided for the Armory.

4. The situation looked very ugly on Thursday night. The scouting forces reported that there were at least seven hundred men gathered in three groups in the neighborhood of Grand Crossing and the Seaboard Shops. The Post

Commander obtained the services of a number of civilians who acted as scouts and intelligence parties. Every effort was made through these men to warn the mob not to attempt to take the jail. In addition to this, they did most valuable scout work. Reports coming to the Post Commander direct indicated that there were at least seven hundred men in three groups, all well armed, and one of the groups was equipped with dynamite.

5. The mob, which was apparently well organized and under command of a couple of leaders, sent in a number of scout cars evidently to size up the strength of the troops at the jail. At least fifteen such cars were turned back by the sentries.

6. The same guard was maintained during the day of Friday, April 21st, and the night of the 21-22. During the night of 21-22, the mob again gathered, but appeared to be more quiet and in better control and disbursed about 11 p. m. after having decided it was useless to attempt to take the jail in the presence of troops.

7. On Saturday night, April 22d, the Guard was cut down to twenty men and one officer, consisting of sixteen men of "F" Company and four men from the Howitzer Company with one gun, which was posted inside of the jail, all under command of 1st Lieutenant Fred Safay. On Sunday night, at midnight, "F" Company was relieved by Captain Mayre Woodward of the Coast Artillery Company with sixteen men, the four men of the Howitzer Company remaining to man the 37 mm. gun.

8. The woman having failed to identify any of the seven suspects, on advice of the Sheriff of Duval County, the Military Guard was relieved at seven p. m., April 24th.

9. An effort was made to get whiskey to the troops on duty apparently by members of the mob, as the sentries were repeatedly approached. A trap was laid and on Saturday two men with an automobile came in through the guard lines with two gallons of moonshine whiskey and were arrested by the guard and turned into the jail.

10. The first meals were provided for the troops by Oil-

reath's Restaurant. Later provision was made by the Sheriff to feed the troops at the jail.

11. The Post Commander desires to commend most highly the officers and men who were sent to duty at the jail for their promptness, willingness to serve and for the efficiency of their service.

R. C. TURCK,
Col. 154th Inf., F. N. G.,
Comndg.

EXHIBIT B

January 13, 1923.

To: *The Adjutant General.*

Subject: *Riot Duty.*

On September 24, 1922, Sheriff Spencer of Hillsborough County requested the Post Commander of the National Guard of Tampa to furnish 75 men and officers to assist in protection of a negro, alleged to have killed a member of the Tampa police force.

This call was received at 10:00 p. m., and orders were given immediately to assemble the necessary troops at Benjamin Field to respond to this call. Eight officers and eighty men reported at the Armory and were immediately taken to the City Hall in motor trucks. The negro prisoner was turned over to the Commanding Officer, who conducted him to the County Jail and guarded him throughout the night. The prisoner was turned back to the Sheriff at 7:00 o'clock in the morning.

This duty was performed without incident, and there was no evidence of riot, or intended riot, to be seen at any time during the night. The troops conducted themselves in a very soldierly manner and performed their duties with great efficiency.

The troops were marched back to Benjamin Field at 8:00 a. m., September 25, 1922, the property checked in and men dismissed.

In my opinion this call for riot duty was unnecessary, and the Sheriff had ample means at his disposal to cope with the situation without calling out the National Guard.

SUMTER L. LOWRY, JR.,

Lt. Col. 116th F. A.

APPENDIX I**MINUTES STATE ARMORY BOARD**

The Armory Board convened pursuant to Special Order No. 179, dated as of December 24, 1921, at the office of the Adjutant General of the State of Florida at the State Arsenal, St. Augustine, Florida. There were present:

Brigadier General Charles P. Lovell.

Major J. H. Spengler.

Capt. George W. Bassett, Jr.

It being ascertained that a quorum was present, upon motion duly made, seconded and carried, the Board proceeded to take up such business matters as were before the Board for action.

Motion was duly made, seconded and carried that all acts and things heretofore done and performed and expenditures of money heretofore contracted to be expended or in fact actually expended without proper authorization from this Board, especially for the improvement of the wharf at Camp Johnston, painting of buildings at Camp Johnston, repairing roofs and repainting roofs at Camp Johnston and the repairing of the buildings at Camp Johnston, as also the repairing of wharf at St. Francis Barracks, the repairing of buildings at the Barracks and the repairing of sheds at the Barracks, and any and all other acts and expenditures be, and the same are hereby, ratified and confirmed in all respects, as also all leases or contracts for leases for armories for the use of the National Guard of Florida, as well as expenditures, therefore be, and the same are hereby, ratified and confirmed as fully and as effectually as if each and every act done and performed by the proper officers of the National Guard of the State of Florida, had been duly authorized by this Board.

Communication from Major Sumter L. Lowry, Jr., F. A., Florida National Guard, addressed to the Adjutant General, concerning certain armory buildings, was read to the

Board by General Lovell, and after a thorough eonsideration and disuection of the matters and things touched upon in said communication, the following action was taken thereon:

A motion was duly made, seconded and carried that Major Sumter L. Lowry, Jr., F. A., F. N. G., Captain C. M. Phipps, William E. Hammer, Homer W. Hesterly and J. J. Hedrick, Jr., F. A., F. N. G., be, and they are hereby, constituted and appointed as a committee to represent the Armory Board of the State of Florida in the matter of the construction of one armory building, one ordnance building, four stables, and one barrack building, provided, however, that prior to the beginning of any construction work on the above mentioned buildings, the said committee above named be, and they are hereby, required to submit any and all plans for the construetion of the aforesaid buildings to the Armory Board for their approval or disapproval or amendment or change; and provided further, that all acts and doings of the beforementioned committee shall be by said committee referred to the Armory Board for ratification and confirmation; that one member of the above mentioned eommitee shall be the treasurer thereof and he shall be required to enter into a good and suffieient surety bond in the sum of five thousand dollars to be made payable in the manner and in the form as is usual in such military bonds. And, said treasurer, after making and entering into such bond, shall be, and by this Board is, designated and authorized to receive from the County of Hillsborough, Florida, and the City of Tampa, in the County of Hillsborough, Florida, the respective sums of money appropriated by the said County of Hillsborough and the City of Tampa, for the purposes of constructing the buildings hereinbefore specifically mentioned; all payments out of said sum shall be upon duplicate vouchers and an aeeurate and correct set of aeeounts shall be kept, which said aeeounts shall at all times be open to inspeetion and audit by a person duly anthonized by the Adjutant General of the State of Florida.

Communication addressed to Gen. Charles P. Lovell, Adjutant General, State of Florida, from H. R. Phillips, Chief of the State Road Department of the State of Florida, was read and upon motion duly made, seconded and carried, it was decided to offer the State Highway Commission three warehouses and one automobile shed at a rental of one hundred and seventy-five dollars per month for as long a time as the said State Highway Commission desire, upon the condition that in the event the State Highway Commission succeeded in having itself released from the rental contract of the Ortega Company, that the rental herein specifically mentioned would be increased, and the Adjutant General was authorized to communicate with the State Road Department along these lines.*

Upon motion duly made, seconded and carried, the following armory rentals were authorized:

Place.	Organization.	Lessor.	Rental.	Lease Expires.
St. Petersburg.....	Hdq. Co.....	Cramer Potter	\$ 41.67.....	July 1, 1922.
St. Augustine.....	Ser. Co.....	Model Land Co.....	25.00.....	One year.

Marianna.....				
Hastings.....	See Ser. Co.....	J. H. Reid.....	27.50.....	Sept. 1, 1922.

Upon motion duly made, seconded and carried, it was decided that the lease on the armory building at Hastings be terminated, and Major Spengler was authorized to take the matter up with Mr. J. H. Reid on the following basis, that is, that the Armory Board would pay to Mr. Reid the cost for the construction of the lockers in the said building and remove said lockers so that the building would be returned to Mr. Reid in the same condition as it was when it was originally obtained, and that Mr. Reid be given a thirty days' notice of the termination of the lease.

There being no further business before the Board, the Board adjourned.

Approved:

CHARLES P. LOVELL,
Adjutant General,
Chairman.

Attest:

GEORGE W. BASSETT, JR.,
Secretary of the Board.

*This arrangement never carried out.

APPENDIX K

**STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL**

State Arsenal, St. Augustine, January 25th, 1922.

**GENERAL ORDERS,
No. 1.**

The range practice season for the calendar year 1922 for the Florida National Guard will be from January 1st to December 31.

By Command of the Governor:

**CHARLES P. LOVELL,
The Adjutant General.**

OFFICIAL:

Chester H. Wilson,
Major 154th Inf., F. N. G.,
Ass't Adjutant General.

**STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL**

State Arsenal, St. Augustine, March 17th, 1922.

GENERAL ORDERS,

No. 2.

1. This office is pleased to announce that the following officers have completed the course for National Guard Officers at the Infantry School, Camp Benning, Ga., and the Coast Artillery School at Fortress Monroe, Va., respectively:

Major Yandell O. Brown, 154th Infantry, percentage attained 87.4, class standing 35.

Capt. Mayre R. Woodward, 1st Company C. A. C., percentage attained 80.9, class standing 8.

By Command of the Governor:

**CHARLES P. LOVELL,
The Adjutant General.**

OFFICIAL:

Chester H. Wilson,
Major 154th Inf., F. N. G.,
Ass't Adjutant General.

STATE OF FLORIDA
 MILITARY DEPARTMENT
 OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, April 1st, 1922.

GENERAL ORDERS,
 No. 3.

1. Captain James L. Ballard, Infantry, D. O. L., having reported as Instructor, Florida National Guard, has been assigned by the Senior Instructor to duty at the State Camp Grounds in addition to his duties at Jacksonville. Captain Ballard will be in charge of Rifle Marksmanship Instruction in the State of Florida and is appointed special range officer in charge of the range at the State Camp Grounds. He is particularly well qualified for the duty of Instructor in marksmanship as he has specialized in this branch of military training.

2. The range at the State Camp Grounds will be open practically at all times, subject to such schedules, rules and regulations as may be prescribed by the special range officer. The range will also be open to civilian rifle clubs and other civilian organizations, to whom a cordial invitation to use the range, is extended. Captain Ballard will be present to assist and instruct men who report for rifle practice. Arrangements will have to be made with him by civilians for the use of the range and targets by the special range officer, and will be required to provide their own cleaning materials, range details and so forth.

3. In addition to the above duties, Captain Ballard will act as Instructor for the units of the Florida National Guard that are stationed at Jacksonville. All troops are urged to avail themselves of Captain Ballard's services to the greatest extent possible and by so doing will be greatly benefited.

By Command of the Governor:

CHARLES P. LOVELL,
 The Adjutant General.

STATE OF FLORIDA
 MILITARY DEPARTMENT
 OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, May 5, 1922.

GENERAL ORDERS,
 No. 4.

SMALL ARMS QUALIFICATIONS Regulations governing Outdoor Season 1922.

1. In accordance with National Guard Regulations, 1919, and Rifle and Pistol Marksmanship (Documents Nos. 1021 and 1050, War Department, 1920) the following regulations governing Small Arms Practice of the National Guard of Florida for the

season 1922, are published for the information and guidance of all concerned.

The Season

The Target Season was announced in General Orders No. 1, A. G. O. Florida, c. s., from January 1 to December 1, 1922.

Minimum Standard

Any company or similar organization which fails to qualify at least 80 per cent of its men will be made the subject of a special investigation and report by the battalion commander with a view to applying corrective measures. This minimum standard is not considered particularly good, but anything less than 80 per cent qualified indicates a lack of proper training.

Records

(a) Small Arms practice will be recorded on the following forms:

- No. 304, A. G. O., Course A, Individual Rifle Record.
- No. 410, A. G. O., Course B, Individual Rifle Record.
- No. 304 (*) A. G. O., Course D, Individual Rifle Record.
- No. 305, A. G. O., Individual Pistol Record.
- No. 307, A. G. O., Report of Individual Classification (rifle).
- No. 308, A. G. O., Report of Individual Classification (pistol).
- No. 506, A. G. O., Consolidated Regimental Report of Small Firing.
- No. 15 (15a), M. B., Consolidated Regimental Report of Small Arms Firing.

(*) Until Course D Form is issued.

(b) The company record of rifle marksmanship consists of the original score cards tabulated at the firing point during records practice. These score cards will be retained with the company for one year, or until the end of the next regular practice season, when they will be disposed of in accordance with regulations. The scores in record practice, and in qualification of enlisted men will be transcribed to their service records under the supervision of the company commander. Until subparagraph (c) Reports has been complied with and the scores transcribed to service records, the company record of marksmanship will be kept in possession of the company commander.

The record of any officer attached to a company for practice will be duly attested and transmitted to the officer.

The record of an enlisted man attached to a company for practice will be similarly attested and transmitted to the officer charged with the custody of the soldiers service record.

Companies that have failed to reach the required minimum standard (80% qualification of those firing) will file copies of report thereon with the target record.

Reports

- (c) All reports of rifle firing will be submitted to the proper

headquarters as soon as possible after the completion of the firing. The reports to be rendered are as follows:

(1) Report of individual classification in rifle practice submitted after the regular season's practice by each company. (Form 307 A. G. O.)

(2) Consolidated regimental report of classification. (Form 506 A. G. O. and 15 M. B.)

(3) Report of company commander in each case where the number of qualified men falls below 80% of those firing, giving the reasons for failure to reach the standard (letter).

(4) Report of the battalion commander on the result of target practice in each company of his battalion, including the result of his investigation of any company that failed to reach the minimum standard (letter).

(5) Report of regimental commander of the result of his investigation of any company that failed to reach the minimum standard and the action taken in each case (letter).

(6) Commissioned officers will be reported on the company reports of individual classification.

Transmittal—(Reports)

As soon as possible after the close of practice season the battalion commander will forward to the regimental commander the reports of individual classification of companies of his battalion, with these he will submit his own report which will be in letter form. He will certify that the reports of individual classification agree with the company records.

The regimental commander will transmit to the Adjutant General, St. Augustine, with the regimental consolidated reports of classification, his narrative report on the result of target practice. This report may be based on reports of battalion commanders, but will contain any additional information bearing on instruction in rifle practice.

Courses to be Fired and Who Will Fire

Attention is directed to paragraphs 101 and 112 inclusive of "Rifle Marksmanship" War Department, Document 1021, dated 1920, showing courses to be fired and who will fire.

Rifle companies, machine-gun companies, service companies, regimental headquarters, and battalion headquarters companies and similar units will fire course A. Mortar transport, motorcycle companies and similar units will fire course B. Coast artillery corps companies will fire Course D.

Insignia

(a) To each officer and enlisted man qualifying for the first time as expert rifleman, sharpshooters, or marksmen, certain insignia indicating their skill in marksmanship, will be issued. In case of loss or damage new issue will be made as explained hereinafter.

(b) Insignia may be worn for one year from date of qualification or requalification, except that insignia for qualification

as expert rifleman which, once attained, may he worn thereafter.

(c) Officers not required to fire may wear the insignia of their last qualification.

(d) Insignia for qualification in Courses A and B are of silver, and for qualification in Courses D and C of bronze.

Duplicates

These Insignia become the property of the person to whom issued. If they are lost by the owner, or in transmission to him, or if they become unsightly from long wear, they may be replaced without cost.

In all cases the official certificates of the company commander to the effect that he has investigated the circumstances of loss or damage and finds that no negligence can be imputed to the soldier will be required as evidence on which to make new issue.

In case of loss, claim must be made within 60 days from date of loss. Duplicate for separate coats will be sold to those entitled to wear insignia.

How Obtained

Immediately after the close of practice season the company commander will report by letter to his commanding officer the names of men in his organization who have made a new or renewed qualification. With this letter the company commander will submit a requisition for the required number of badges and bars. This requisition will be disposed of as any other special (P. and S.) requisition.

AMMUNITION ALLOWANCES

Special Regulations No. 31, War Department, and Circular Letter No. 33, Militia Bureau, dated June 1, 1920, govern the allowance of small arms ammunition to Nation Guard Units.

Pistol Practice—Who Will Fire

All officers armed with the pistol and with less than 15 years service, commissioned, or commissioned and enlisted, and all enlisted men with the pistol are required to fire the dismounted pistol course. Officers armed with the pistol and with over 15 years service, commissioned or commissioned and enlisted, are authorized but not required to fire.

Courses to be Fired

Attention is directed to paragraphs 81 to 90 inclusive, "Pistol Marksmanship, War Department, Document 1050, dated 1920, and to Circular Letter No. 27, Militia Bureau, dated April 7, 1922, which prescribes the course to be fired.

Insignia

To each officer and enlisted man qualifying for the first time

as pistol expert, pistol sharpshooter, or pistol marksman, certain insignia indicating skill in marksmanship, will be issued. Insignia will be worn from date of qualification until the next opportunity to requalify, or for one year if no opportunity for requalification is presented within that year. Officers who are not required to fire may wear the insignia of last qualification. Duplicates of insignia may be procured as provided for rifle duplicates as hereinbefore mentioned.

Records and Reports

Records—The following records will be kept in each company as far as applicable:

- (a) Individual record of pistol firing, Form 305 A. G. O.
- (b) Record of Collective practice.

The disposition of pistol records will be as prescribed for rifle records in this order.

Reports—All reports of pistol firing will be submitted to the proper headquarters as soon as possible after the completion of firing, the reports to be rendered as follows:

- (a) Report of individual classification, pistol practice, Form 308 A. G. O.
- (b) Consolidated regimental classification, pistol practice.
- (c) Reports of collective practice.

Reports will be transmitted as prescribed for rifle reports in this order and by Paragraph 130, Pistol Marksmanship, War Department Document 1050, dated 1920.

General Instructions

Before leaving the armory for the range all rifles and pistols will be inspected, and they will again be inspected prior to leaving the range for home stations. Arms will be loaded at the firing points, only. Under no circumstances will a soldier be allowed to leave the firing point with a loaded weapon or permit it, so loaded, to pass out of his hands. Magazines will not be filled in slow fire practice. Except at firing points, the carrying of a loaded pistol, either in the holster or band, is prohibited.

Any accidents occurring will be immediately reported to this office, and will be made the subject of rigid inquiry with a view to action by court martial in cases which develop negligence or recklessness. Every officer and non-commissioned officer will act promptly, as above, in such cases as may come under their observation.

The commissioned officer under whose supervision practice is held will certify in writing, and on honor, to the correctness of the scores turned in as made during his tour of duty.

In compliance with Paragraphs 525, 907 and 908, National Guard Regulations, 1919, unit commanders will cause all empty cartridge cases, empty packing cases, bandoliers and clips to be saved and turned into the State headquarters at the end of the season.

Qualifications With Other Arms

Qualification requirements for automatic rifles, machine guns, Stokes mortars, and 37 m-m guns are covered in special regulations issued to units armed with these weapons.

Texts and Memoranda

All members of the Guard are enjoined to make a comprehensive study of War Department Documents 1021 and 1050, as amended and Circular Letter No. 27, Military Bureau, dated April 7, 1922. Attention is also directed to General Orders No. 3, these headquarters.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

CORRECTED COPY—DESTROY ORIGINAL.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, June 13th, 1922.

GENERAL ORDERS,
No. 5.

1. The following courses of study for periods after July 1st, 1922, prepared by Colonel Earl C. Carnahan, Infantry, D. O. I. Senior Instructor, under the provisions of National Guard Regulations 1922, and modeled upon somewhat similar instructions prepared for Wisconsin officers by Colonel Collin H. Ball, U. S. Army, in 1921, are published for the information of all concerned.

These courses are prepared by Col. Carnahan, in the course of his duty under the regulations, not only as a matter of instruction, but also in those special cases to which regulations apply, as affecting the pay of those concerned. The careful study of the National Guard Regulation 1922, with reference to matters of pay, is enjoined upon all concerned and full compliance with its requirements is announced as necessary to obtain the approval of the Senior Instructor; without which payment becomes a matter for interpretation and decision of other designated authority, with all the delay and jeopardy incident thereto.

2. While the same course is recommended for officers of Field and Coast Artillery, they are exempted from the provisions of this document because they are expected to receive that instruction from their own specially detailed instructors required by National Guard Regulations.

3. This publication in no wise modifies existing law or regu-

lations which are available to all, in pay matters, but is notice of the requirements of the Senior Instructor as he sees his function in this respect.

Any other requirements of competent authority will of course additionally govern.

All concerned, however, are notified that while the PAY factor is important that of EFFICIENCY is far more so, hence the main thing that should be considered by all is MILITARY EFFICIENCY. Does the obligation of your oath of service place DUTY above PAY, whatever the importance of the latter may be?

4. This work will be undertaken in addition to uniformed participation in assemblies for drills required by regulations.

5. All officers of the Field Staff so located that they cannot attend assemblies for drill or who are not required by regulations to so attend at all times will, at the end of each period AFTER July 1st, 1922, for which armory drill pay is claimed, execute certificate in the form appearing below. This certificate in TRIPPLICATE will be forwarded to the officer charged with the duty of making the pay roll for the period who will complete the rolls and attach one copy of the certificate to each copy thereof for the information of the army officer charged with the duty of authentication.

Model Form

192..

I certify on honor that I have performed military duty during the period.....and.....as set forth in detail in the following statement:

Date.	Character of Duty Performed.	Time.
July 1, 1922	Correspondence course	1½ hrs.
July 5, 1922	Studied N. G. R. (pass....to....)	1½ hrs.
July 11, 1922	Studied N. G. R. (pass....to....)	1½ hrs.
July 18, 1922	Studied S. R. 57.....	1½ hrs.
July 25, 1922	Drilled with Co.....	1½ hrs.

(Signature.)

(Grade.) (Organization.)

Note: If no correspondence course was taken, make no entry. Enter only actual number of lessons and time consumed. The certificate should simply state detailed facts in the form given.

6. The foregoing certificate will be prepared and submitted by each officer concerned whether his attendance at drills or study of the subjects set forth herein has been continuous for the period or not. In the latter case his certificate will cover the period actually given to study and attendance at drills, with dates, subjects, and the time devoted thereto in the detailed number already indicated.

7.

For All Officers

SUBJECT	TEXT
Administration.....	National Guard Regulations, complete. Circular letters, etc., from Military Bureau, Finance Rulings, etc., as issued from time to time, Special Regulations 57. Appropriate parts of Army Regulations.
Military Law.....	Manual for Courts-martial 1921, entire book. Special attention to both Introductions; Evidence; Punitive Articles of War; and Forms for Charges and Specifications (Appendix 6).
Field Service.....	Field Service Regulations 1914, as amended.
Military Hygiene...	The Elements Hygiene (Ashburn) and S. R. No. 28, W. D., 1917.
Range Practice.....	Authorized Manuals.
Map Reading.....	Platoon Training (Waldron) Vol. 1, Chap. XII.
Military Courtesy...	Platoon Training (Waldron) Vol 1, Chap. VII.

For Officers of the Quartermaster Corps
(Same as for all officers and the following):

General Duties.....	Manual of the Q. M. C., with special reference to blank forms, contracts, bonds, returns, accounts, current bills of lading, transportation requests, public vouchers and pay rolls. Also the Services of Supply and Transportation F. S. R.
Hippology.....	Horses, Saddles and Bridles (Carter).

For Engineer Officers
(Same as for all officers and the following):

Military Engineering	Engineering Field Manual. Parts I to VII. With a special reference to Map Making and Map Reproduction, Bridges, Roads and Field Fortification.
----------------------	---

For Officers of the Inspector General's Department
(Same as for all officers and the following):

General Duties.....	Guide for the Use of Officers of the Inspector General's Department (corrected to April 1st, 1917). Inspection Service of Armies in the Field—S. R. 69, W. D., 1917.
---------------------	---

For Ordnance Officers
(Same as for all officers and the following):

Material.....	Various Ordnance Types and Function of Each.

Officers Judge Advocate General's Department
 (Same as for all officers and the following):

Constitutional Law...	Any suitable text.
International Law...	The Elements of International Law. (Davis.)
Statutes.....	Those specially relating to the Army and National Guard and particularly the Act of June 4, 1920.

By Command of the Governor:

CHARLES P. LOVELL,
 The Adjutant General.

STATE OF FLORIDA
 MILITARY DEPARTMENT
 OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, June 19th, 1922.

GENERAL ORDERS,
 No. 6.

Announcement is made to the Florida National Guard of the award of the Distinguished Service Medal by the War Department to Colonel Raymond C. Turck, now commanding the 154th Infantry, Florida National Guard. The award of the Distinguished Service Medal by the direction of the President, under the provisions of the Act of Congress approved July 9th, 1918, as amended by the Act of Congress approved April 7th, 1922, is as follows:

"Raymond C. Turck, Lieutenant Colonel Medical Corps, United States Army. For exceptionally meritorious and distinguished services as division surgeon, 35th Division. During the Meuse-Argonne offensive Colonel Turck organized the medical service of that division and provided hospitalization and evacuation facilities for the sick and wounded under conditions which rendered the service of the medical department unusually hazardous and difficult. Residence at appointment, 1534 Riverside Avenue, Jacksonville, Fla."

By Command of the Governor:

CHARLES P. LOVELL,
 The Adjutant General.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, July 18th, 1922.

GENERAL ORDERS,
No. 7.

1. Pursuant to authority contained in telegram, Headquarters 4th Corps Area, Ft. McPherson, Ga., July 6th, 1922, and letter M. B. 354, 1-Fla., June 23, 1922, the following troops of the recognized National Guard of the State of Florida will attend 15-day Camp of Instruction to be held at Camp Joseph E. Johnston, Jacksonville, Fla., August 4th to 18th, 1922, inclusive.

The State Staff Corps and Depts.
154th Infantry.
220th Motor Transport Co.
114th Motorcycle Co.

2. Col. Raymond C. Turck, 154th Inf., is assigned to command the camp and will report at State Camp Ground, Camp Joseph E. Johnston, not later than the morning of August 3rd, 1922.

3. The following officers of the State Staff Corps and Departments will report to the camp commander for assignment to the duty opposite their names:

Major J. H. Spengler, Camp Quartermaster.
Capt. Alpha O. Stacer, Asst to Camp Quartermaster.
2nd Lieut. Chas. P. Lovell, Jr., Asst to Camp Quartermaster.
(All of the above mentioned officers to report Aug. 1st.)
Capt. Geo. M. Coslick, Ord. Dept., Ordnance Officer.
Capt. Geo. J. Garcia, I. G. Dept., Inspector.
Capt. Geo. W. Bassett, J. A. G. Dept., Judge Advocate.

Captain H. C. F. Dohm will, in addition to his other duties, be assigned as Assistant to the Camp Quartermaster and will report at State Camp Grounds August 1st, 1922.

3. All organizations will leave their home stations so as to arrive at State Camp Grounds not later than 10:00 p. m. August 3rd, 1922. A schedule showing time of departure train movements is appended hereto.

4. All available men of the various organizations must attend camp. No one will be excused except for urgent reasons and then only on request approved by this office.

5. The Commanding Officer will be held responsible for the discipline, care of property, hygiene and general work of the command. He will put into effect the schedule of instruction prepared by the Senior Instructor and see that it is fully carried out.

6. While en route to and from camp strict discipline will be maintained, all property will be safeguarded and no depredations will be committed. It is absolutely essential that the Florida National Guard avoid criticism as to the behavior either en route to and from camp or while at camp. The senior officer

present will be responsible for the discipline of the troops while en route.

7. No one afflicted with contagious or venereal disease will be permitted to attend camp. Men so afflicted will not be counted for duty and neither will they receive pay. All inoculations and vaccinations should be completed before going to camp.

8. No purchase or expenditure of any character other than those provided for under this order or as may be specifically authorized by the Adjutant General, will be made by any officer or enlisted man in the name of the State. Bills for unauthorized purchases will not be paid.

9. All organizations will take their full field equipment, including signal equipment, kitchen utensils, hedsacks, two blankets per man, mosquito bails, and a supply of cleansing and preserving materials. Each officer and enlisted man will carry his full field equipment. The following will be supplied at camp:

Brooms,
Brushes, scrub,
Mops,
Lye,
Soap,
Tollet paper,
Ammunition.

Enlisted men will not be allowed to carry any baggage other than their military equipment and clothing.

10. No organization will leave its home station with less than the required number of officers and men as prescribed in par. 932 N. G. R. 1922.

11. It is the duty of each Commanding Officer and Company Commander to carefully inspect the coaches and baggage cars assigned to the command. Such inspection is to be made just prior to the time of departure and in company with the conductor or other representative of the railroad. Careful note will be made of any broken glass, damaged seats, or other defects in the train equipment and such defects will be called to the attention of the railroad representative. Prior to or at the time of detraining a similar inspection will be made and should the coaches or baggage cars have suffered damage while occupied by the troops the conductor will be asked to specify in writing at that time and the extent of damage will be agreed upon between the Commanding Officer and the railroad representative. A statement showing the circumstances, with the cost of repairing the damage, will be signed by the conductor and the Commanding Officer. This statement will be sent to the United States Property and Disbursing Officer, through this office.

12. Every officer and enlisted man of the command will be informed before leaving their home stations that they will be held responsible for the damage done to the train equipment, or other property. Should any damage result during the occupancy of troops the Commanding Officer will cause an investigation to be made to fix the responsibility for the same. The amount of damages having been determined the amount thereof will be collected from those responsible therefor. If unable to fix the responsibility, the cost will be pro-rated among the mem-

bars of the unit occupying the damaged car. In addition such disciplinary action will be taken as the circumstances warrant.

13. Organization Commanders, except those at Jacksonville, will report by telegraph their time of departure from home station and probable time of arrival at camp.

14. Upon arrival at camp each Staff Officer and each Company Commander will report to the Camp Commander for assignment to quarters. A roster showing men present and absent will be submitted by each organization immediately after arrival. Morning reports will be submitted during the period August 3rd to 19th, inclusive.

15. Camp transportation facilities will be operated under direction of Camp Quartermaster. This includes activities of the Motorcycle Co., and Motor Transport Co., in so far as pertains to motor transportation.

16. Upon completion of the duty connected with the Camp of Instruction the Commanding Officer will make a full report to the Adjutant General of the State, covering the activities of the camp. This report must be forwarded not later than September 30th, 1922.

17. Upon completion of the 15-day camp the troops will return to their proper stations.

18. The U. S. Property and Disbursing Officer will furnish the necessary transportation for the journey and for the return of troops to their proper station. Not later than July 28th, each unit commander will advise this office by telegram the number of officers and enlisted men separately for whom transportation will be required.

19. Commutation of subsistence will be paid at the rate of \$1.20 per day per man (or 40c per meal for the actual number of meals necessary to purchase en route.) The method of purchasing meals is prescribed in Circular No. 69, Headquarters 4th Corps Area, dated May 31st, extract copy of which is appended. The allowance for rations while in camp is 50c per man per day.

20. The travel directed is necessary in the military service.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, July 19, 1922.

GENERAL ORDERS,
No. 8.

The following program of instruction for the Armory Training Year 1922-23, prescribed by Col. Earl C. Carnahan, Infantry, D. O. L. Senior, Instructor, for Infantry, Motorcycle, and Motor Transport units, is published for the guidance of all concerned.

Field Artillery, Coast Artillery and Medical units will comply

with programs prepared by their specially assigned instructors.
By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

PROGRAM OF INSTRUCTION FOR INFANTRY, MOTOR-CYCLE, AND MOTOR TRANSPORT UNITS, FLORIDA NATIONAL GUARD, ARMORY TRAINING YEAR 1922-23.

1. The Armory training period covered by this program is September 1, 1922, to August 31, 1923, inclusive.

2. The total number of drills for which payment is authorized in a year is sixty (60), not exceeding eight (8) in any month for enlisted men nor five (5) for officers.

Time allowance has been provided for the maximum number of drills but, due to the 15-day field training period and other causes, it is not expected that this number can be held in all organizations. Where a less number is held the organization commander should give due consideration to proper proportionate employment of both subjects and time.

Each drill will cover a minimum of 1½ hours, exclusive of rests.

3. Only general subject and time distribution tables are given. Except in the matter of calisthenics, as prescribed in paragraph 4, the details of subject and time to be devoted to each are not prescribed.

At least 1½ hours, exclusive of rests, at each drill will be employed by the officer in command to the best advantage according to the necessities of his organization. This method is prescribed because of the difference in proficiency in various subjects in different organizations. To get the greatest good, however, it is absolutely necessary that organization commanders carefully study the distribution tables and also form sound conclusions as to the relative needs of their organizations at particular times in the subjects prescribed. They should then (after making this study and forming these conclusions) carefully prepare and publish detailed drill schedules, by subject and time to be devoted to each at each drill, for one month ahead.

In doing this it must be borne in mind that the greatest good cannot be accomplished unless the schedules are arranged so as to provide for progressive instruction based on THOROUGH and COMPLETE teaching of fundamentals—the small things of detail in the various schools, beginning with that of the Soldier.

If this is done intelligently and in such a way as not to be a bore, both men and officers will respond because they can clearly see the value of the various steps and realize results accomplished.

4. Calisthenics will be given for ten (10) minutes at the beginning of each drill.

If any real good is to be derived these exercises must be carefully planned, vigorously given, and participated in by officers by actually doing the movements with the men.

5. Use symbol letters for reporting character of drills on pay rolls.

All mess sergeants, cooks, buglers, company clerks, mechanics, automatic riflemen, and other specialists will be trained in their particular duties.

7. Schools.

Schools for privates, N. C. O's, and selected privates will be conducted by organization commanders. The course should be carefully planned so as to progressively cover not only that provided for the organization but also such things as map reading, topographical sketching, scouting and patrolling, field messages, etc., etc.

RIFLE COMPANY

Subject and Time Distribution Table

Sym- bol.	Subject.	Armory Hours.
A—Calisthenics		8
B—School of the Soldier (To include arm and whistle signals)		4

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, Sept. 1, 1922.

GENERAL ORDERS,
No. 9.

The following letter from the Honorable Cary A. Hardee, Governor of Florida and Commander in Chief of the Florida National Guard, is published to the troops:

General Chas. P. Lovell,
St. Augustine, Fla.

Dear General Lovell:

One year ago I had the pleasure of visiting officially the National Guard Encampment and afterwards an opportunity of giving expression of my appreciation of the splendid personnel of the officers and enlisted men, as well as the discipline in the Camp of Instruction. My recent visit to the National Guard Encampment and review of the troops gives me cause for further pride in these patriotic men who have loyally volunteered to uphold the authority of their country and have shown willingness to give their time and energy in preparation of efficient service to their country. I was pleased with the fine spirit of both officers and men, and gratified at the enthusiasm with which all entered into the details of work incident to a camp of training. I was scarcely prepared to find such marked improvement in many of the activities of the encampment. Certainly, the excellency of the work in rifle marksmanship and machine gun firing is worthy of special mention. The proficiency attained as proven by the records made is truly gratifying.

Will you express to the various units throughout the State my appreciation of their loyal service.

Yours very truly
CARY A. HARDEE,
Governor.

The Adjutant General desires to take this opportunity to express to the troops his appreciation for the fine work done since the camp one year ago. The troops taken as a whole are in far better condition, although they were very good last year.

It is believed that our Guard has made a record, especially in small arms and machine gun firing, that will not be surpassed by any National Guard troops in the United States.

The conduct of the men at Camp, their eagerness to learn and the work done would cause any officer to be proud of them and it is quite certain that the personnel of the Guard, both officers and men, will compare favorably with those of any other State or department.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, Sept. 2, 1922.

GENERAL ORDERS,
No. 10.

The following report made by Colonel Earl C. Carnahan, Senior Instructor, Florida National Guard, is published to the troops:

August 22, 1922.

Subject: Field Training Camp, 1922.

To: The Adjutant General, State of Florida.

1. Summarizing the results of our Camp, August 4-18, inclusive, which was attended by all units in the State, except artillery, it is both my pleasure and my duty to use the single word SPLENDID.

The underlying thought in my mind that governed the preparation of the Training Program speaks in the program itself and further emphasized in my address to the officers at the opening of the camp.

That substantial progress was made along the lines indicated in both the program and the address is apparent to even the most casual observer.

Where there was so much spirit to serve and learn and do; so much hard work and real accomplishment; and so much cheerfulness and loyalty under badly hampering conditions of frequent rains and very large sick report due to an epidemic of la gripe, it would indeed be more ungracious to make reference here to any of the several matters of daily adjustment incidental to all training camps, Regular or National Guard. Such matters were dealt with on the spot and have no place here. The manner of dealing with them and lessons learned by both Instructors and members of the Guard will bear fruit in the next camp.

By any fair standard of measure the camp was a pronounced success.

This was due (a) to the innate worth of the personnel; (b) to its preliminary training; (c) to whatever fair measure of credit there may be to the scheme of training prescribed (I write (c) with some hesitancy, but feel that it has a place); and (d) to the desire to learn and the very great industry of the Guard; (e) last but not least, the excellent preliminary arrangements made by you personally, your staff and Col. Turck and his staff for preparing the camp grounds, supplying the troops and moving them, detraining them, preparation and publication to the troops prior to their arrival of an order in the nature of Camp Regulations (including list of calls), and a final order providing for the orderly breaking of camp, police of barracks and grounds, clearances and the entraining for home.

Attendance

All organizations brought at least the required minimum of enlisted men to camp, but a few of them had very strong absentee lists.

There was but one (1) officer absent, and this was on account of sickness. This is a most remarkable record and one to be greatly proud of.

Vaccinations and Inoculations

On arrival at camp these items were not quite 100% complete, due to recent enlistments and the fact that medical officers had not been able to visit all units recently. But before the completion of camp both items were brought to 100%. This is an enviable record.

Arrival and Detraining

Quiet, orderly, wholly without confusion, and expeditious. A model operation.

Departure and Entrainning

There were of course some small matters of adjustment, but I hesitate to use modifying language.

Training Accomplishments

Very great, not all that were desired, but certainly greater in many respects than were expected. Daily progress along lines of precision and thoroughness was easily noticeable. Substantial progress was made in the execution of field problems. Drill ground progress in fundamentals was most noticeable. In fact, I scarcely expect to ever see a better review and guard mount than was staged for the Governor when he visited the camp shortly before its close. Most certainly the steadiness, precision and snappiness of the entire command were very greatly improved during the camp.

Due both to the importance of the subject itself and the requirements of regulations we stressed range practice. The range is one of the finest in the country, if not the best. Two and one-half days were devoted to preliminary instructions before a shot was fired. The value of this was not apparent at all. To some few it seemed a heavy toll to take from our too short training period. But the results accomplished fully justified the price. Results were as follows:

Rifle Marksmanship

Experts	35	One company qualified more than 91% of men firing.
Sharpshooters	33	
Marksman	88	

Machine Gun

Experts	12	General average of more than 51% qualification of men firing.
Sharpshooters	23	
Marksman	42	

Howitzer Company

Very fine with both 37 M. M. guns and mortars. A deadly outfit.

The records of last year are so incomplete that no proper comparison can be made but it is known that only 3 experts were made then.

The epidemic before referred to as raging in camp prevented many men from firing and sadly impaired the shooting of many who did fire. Considering this and the short time available, the results obtained are remarkable. As a further evidence of the value of our range work, I am informed this morning that 9 of the men firing on the range to determine the team to go to Camp Perry, the low score man of the team will have at least 270, whereas the low score of last year had only 190.

In conclusion, it is my deliberate opinion that the Guard of Florida is to be congratulated and commended for the work it has done and the efficiency it has attained under the handicaps of small appropriations and small unit stations. Above all, it has a splendid spirit. So long as that spirit is maintained, it need have no fear of having to take a back seat to any other.

Finally, may I request that this letter be published to the Guard.

EARL C. CARNAHAN,
Col. Inf., D. O. L.

Colonel Carnahan completed his tour of duty with the Florida National Guard today. He goes on leave prior to retiring. This officer has done much for our troops and has taken great pride in their achievement. His knowledge, energy and work has contributed greatly to the splendid condition of our Guard today. We wish him well in his future life after retirement from the army.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, Sept. 15th, 1922.

GENERAL ORDERS,
No. 11.

Major Chester H. Wilson, 154th Infantry, Florida National Guard, is relieved from duty as Assistant Adjutant General, Florida National Guard, effective October 15th, 1922.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, Oct. 25th, 1922.

GENERAL ORDERS,
No. 12.

1. The following are appointed a board for the examination of candidates for nomination of one by the Governor of Florida for appointment to the United States Military Academy:

Captain George W. Bassett, J. A. F. N. G.
Dr. Albert H. Walker, Deaf and Blind Institute.
Mr. G. B. Lamar, President St. Augustine National Bank.

The board will meet in the office of the Adjutant General, State Arsenal, St. Augustine, Florida, 11:30 a. m. Tuesday, November 14th, 1922.

2. To be eligible for appointment from the National Guard an applicant must be an enlisted man of a unit recognized by the Federal Government. He must, on the date of admission, July 1, 1923, have served as an enlisted man not less than one year, must be between the ages of nineteen and twenty-two years, and must not be less than five feet four inches in height. The age and service requirements are statutory and cannot be waived or modified but it is not essential that the services be continuous, so that former service in the National Guard may be counted in determining an applicant's eligibility. Similarly, service with a National Guard Organization prior to its recognition by the Federal Government may be considered, the date of enlistment of the soldier governing and not that of the recognition of the unit.

3. Enlisted men who desire to take this preliminary examination will forward their applications requesting permission to do so, to the Adjutant General, State Arsenal, St. Augustine, Florida, at an early date. Applications must be accompanied by a certificate from a medical officer of the National Guard stating that the applicants physically fill the requirements of the War Department for entrance to the United States Military Academy; also not less than two letters of recommendation from known and reputable citizens of the State as to their moral standing. Candidates must be unmarried. The personal expenses of the candidates appearing before the board must be borne by themselves. Applicants on request will be furnished

with a pamphlet giving information regarding requirements necessary to enable them to enter the competitive examination.

4 His Excellency, the Governor, will select from those standing the highest in the competitive (preliminary) examination his candidate for the entrance examination to the United States Military Academy.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, Nov. 6, 1922.

GENERAL ORDERS,
No. 13.

First Lieutenant Charles E. Harris, Adjutant, 2nd Battalion, having reported to this office for duty, is assigned as Assistant to the Adjutant General.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, Nov. 6, 1922.

GENERAL ORDERS,
No. 14.

An Act of Congress signed by the President provides that all National Guard officers may be issued Reserve Commissions in their present rank and grade in the National Guard. All officers who do not hold reserve commissions of equal or superior rank will immediately make application for a Reserve Commission.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL
State Arsenal, St. Augustine, Nov. 6, 1922.

GENERAL ORDERS,
No. 15.

The following letter from the Corps Area Commander is published to the Florida National Guard:

Headquarters Fourth Corps Area,
Fort McPherson, Ga., November 2, 1922.

Subject: Field Inspection Reports, Florida National Guard.

To: The Adjutant General of Florida, St. Augustine, Fla.

1. Your attention is invited to the following extracts from Field Inspection reports covering the fifteen-day National Guard encampment of units of the Florida National Guard for the current year:

2. The reports indicate commendable interest and gratifying progress.

3. Where deficiencies are noted your corrective action is requested.

a. State Staff Corps and Department, Camp Joseph E. Johnston, Fla.

(1) State Staff Corps and Departments functioned in fine shape. Excellent preliminary arrangements were made (a) by putting the grounds, barracks, target range, etc., in shape, (b) for supplying troops, (c) for moving them to camp and (d) for moving them home.

(2) Camp administration was excellent with exception of conduct at the range. Otherwise it was smooth-working, quiet and efficient.

(3) Camp police was excellent under the energetic supervision of Captain C. Seton Fleming, Adjutant General's Department, specially detailed.

(4) Camp Inspection: Captain George J. Garcia, Inspector General's Department, handled his job energetically and efficiently, and was of great assistance to the Camp Commander in many ways.

(5) Fortunately the Judge Advocate, Captain Bassett, had very little to do, but he did that in a highly satisfactory manner.

(6) The Adjutant General of the State was present and conducted the business of his office efficiently and promptly. In many ways his position (as in any similar case) was somewhat delicate. The proposition of conducting affairs of his office from the camp of another officer without unduly interfering with the prerogative and duties of the other officer was somewhat ticklish, but he did it in admirable fashion.

(7) The supply detachment was ably and efficiently con-

- ducted by Major J. H. Spengier, State Quartermaster and United States Property and Distributing officer. He was ably assisted by Captain J. R. Ingram, Supply Officer, 154th Inf., and Second Lieut. Charles P. Lovell, Jr., Q. M. C.
- (8) The work of Captain George M. Costick, Ordnance Department, as range office was fine.
 - (9) Organization conforms to Table of Organizations except that it is short one medical officer and battalion headquarters companies are not organized.
 - (10) Observance of military courtesy, excellent.
 - (11) Most substantial improvement was shown along all lines.
 - (12) Control of officers and noncommissioned officers over enlisted men, very good indeed.
 - (13) Conduct of men in and out of camp, excellent. A most quiet and orderly camp.
 - (14) Character of enlisted personnel: Average young Americans from small average American towns.
 - (15) Arms, uniform and equipment: Clothing and equipment quite complete as prescribed. Recommend one more hat and one pair of breeches be authorized for each man.
 - (16) A well administered camp. No confusion. Forethought was used and proper instructions prepared and given. The administration machinery worked quietly, smoothly and efficiently.
 - (17) Companies A, D, F, H, M and Howitzer Company especially efficient, others range from fair to good. There are no specially inefficient companies.
 - (18) Radio section not properly trained; no instruments or equipment.
 - (19) Wire section, some good men but no equipment; needs training.
 - (20) Radio panel equipment, none.
- d. 114th Motorcycle Company and 220th Motor Transport Co.,
Camp Joseph E. Johnston, Fla.
- (1) Administration in Motorcycle Company, very good by keen active young officer and Motor Transport Co., poor. Commanding officer was relieved from command by Camp Commander; much improvement thereafter. Lieutenant Faucette in command of this company is weak and has none of the qualities of an officer.
- c. 437th Company, Coast Artillery Corps, Fort Monroe, Va.
- (1) Captain Mayre R. Woodward was commanding officer and also company commander. He performed the duties of commanding officer and company commander in a very satisfactory manner. There were no staff officers with the Florida Coast Artillery National Guard.
 - (2) Organization conforms to Tables of Organization except that company was temporarily over strength due

- to delay in transferring some men to another organization.
- (3) The degree of improvement was very marked.
 - (4) Conduct of men in and out of camp excellent. Conduct was such as to be highly commended by Coast Defense Commander. No trials or disciplinary measures necessary with enlisted personnel.
 - (5) Arms, uniforms and equipment: Condition and sufficiency of arms very good, equipment very good. Well taken care of by organization and individuals. There are no real deficiencies.
 - (6) Records—completeness, legibility and accuracy, very good.
 - (7) Administration very good.
- d. First Battalion, 116th Field Artillery, Camp Bragg, N. C.
- (1) The battalion commander and his staff performed their duties in a satisfactory manner. Major Sumter L. Lowry, Jr., had had no prior experience in Field Artillery. From the manner in which he grasped the instruction given him during the encampment and his ability as demonstrated while here in handling his organization, qualifies him as an excellent officer to handle this battalion.
 - (2) Organization conforms to current Tables of Organization.
 - (3) The degree of improvement for this organization was very marked, due greatly to the fact that they were recently organized and this was their first encampment.
 - (4) At all times the disciplinary control of officers over their men was excellent. That of the noncommissioned officers was fair. As leaders the officers were good but lacked experience.
 - (5) Conduct of men in and out of camp excellent.
 - (6) There is a marked organization spirit throughout the battalion, fostered by athletic as well as efficiency contests.
 - (7) The only deficiency in equipment that I believe is essential is the French Slo-goniometer (Aiming Circle). There is a complete sufficiency of all other arms and uniforms and equipment and it is well stored and taken care of by both organizations and individuals.
 - (8) The records were not complete, due to new enlistments just prior to leaving camp; legibility, satisfactory; accuracy, fair. Instruction in keeping of records was not all that it should be, either in camp or at home.
 - (9) In general the battery administration was good.
 - (10) All units are equal in training and efficiency.

(Signed) B. B. PARROTT,
Adjutant.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, Nov. 29, 1922.

GENERAL ORDERS,
No. 16.

- Under the provisions of General Order No. 14, dated May 20, 1906, Private 1st Class Albert E. Barrs, Company "F", 154th Infantry, is hereby awarded the fifteen (15) year service medal. This medal may be worn upon all official occasions, and upon the discretion of its owner, upon appropriate social occasions.

Military History

Private Barrs first enlisted in Company "D," 1st Infantry, Florida State Troops, on September 4th, 1905, and served with that organization in that grade, Private, Corporal, Sergeant and First Sergeant, until April 1, 1909. He was commissioned Second Lieutenant on April 1, 1909, and assigned to 1st Battalion, 1st Inf., Florida State Troops, as Quartermaster and Commissary. In April, 1910, he was promoted to 1st Lieutenant and assigned to Company "B," 1st Inf. In August, 1911, he was commissioned Captain and assigned as Commissary 1st Inf. In June, 1912, he was transferred to command Company "D," 1st Inf. He resigned and was discharged March 10th, 1914, and re-enlisted in Company "D," 1st Inf., on March 18, 1914, serving in that unit and Company "B" and later Company "D" until the 1st Separate Battalion, National Guard of Florida, was called into Federal service at the beginning of the World War, April 15, 1917. Shortly after he was ordered to report to the first Officers Training Camp, Fort McPherson, Ga., and was there commissioned 1st Lieutenant Inf., Officers Reserve Corps. On Aug. 15th, 1917, he was promoted to Captain, Infantry, O. R. C., and served with the 326th Infantry at Camp Gordon, later being assigned to command the detachment of men undergoing special training at Alabama Polytechnic Institute, Auburn, Ala. After the Armistice he was appointed Professor of Military Science and Tactics at this college and served as such until discharged from the army, Sept. 12, 1919. Returning to Jacksonville he enlisted in the first unit of the National Guard of Florida, which was organized at that Post. The 7th Separate Company, now Company "F," 154th Inf., and now serving as a soldier in this organization. In addition to being actively connected with the National Guard of Florida, this soldier is also a Captain in the Adjutant General's Section, Officers Reserve Corps.

By Command of the Governor:

CHARLES P. LOVELL

STATE OF FLORIDA
MILITARY DEPARTMENT
OFFICE OF THE ADJUTANT GENERAL

State Arsenal, St. Augustine, Dec. 26, 1922.

GENERAL ORDERS,
No. 17.

1. The Commanding General, Fourth Corps Area, has informed these headquarters that the Annual Armory Inspection of the calendar year 1923 will also include a physical inventory of all Federal property and supplies in the hands of the National Guard. The itinerary of each Regular army officer designated to inspect units of the National Guard in this State and make inventory of the property thereof will be duly announced in orders from these headquarters.

2. The inspection and inventory is conducted at great expense to the Federal Government and each hour the inspector is detained longer than necessary at any one place means added expense. To facilitate the conduct of the inspection and inventory the following orders will be strictly complied with by all officers concerned:

(a) At least two enlisted men, preferably the property sergeant and company clerk, will assist the inspector in making the inventory of Federal property of the unit.

(b) All property should be arranged in the best order possible, and so that inspection as to condition, as well as a proper and expeditious inventory, may be made.

(c) Each unit commander will prepare a list of Federal property in the hands of his unit, indicating order of arrangement or point of storage, for the convenience of making the inventory. A copy of this list will be furnished the latter immediately upon his arrival, and one copy will be sent to the United States Property and Disbursing Officer for his information.

By Command of the Governor:

CHARLES P. LOVELL,
The Adjutant General.
